NANOCABLE
The way to connect

UNIDIRECTIONAL VGA MALE TO HDMI MALE CONVERTER CABLE

10.15.4602

EAN: 8433281016361

Connects devices with VGA output to screens, televisions or projectors with HDMI input. It is the perfect solution to breathe new life into older equipment and keep it compatible with current technology.

Enjoy resolutions up to 1920x1080@60Hz (Full HD), with support also for 720p, 1600x1200 and 1280x1024.

Thanks to its **Plug and Play** system, you just need to connect it to start using it, without any additional configuration.

Simple and **practical** design for ease of use wherever you need it.

Specifications:

- Unidirectional VGA male to HDMI male converter cable.
- Converts analogue VGA signal to digital HDMI signal, ensuring stable, high-quality transmission.
- Supports resolutions up to 1920x1080@60Hz (1080p Full HD) including 720p, 1600x1200, 1280x1024.
- Plug and Play system, just connect and it works.
- **NOT COMPATIBLE** with low voltage HDMI devices.
- **NOT COMPATIBLE** with Blu-ray, PS4, Apple MacBook Pro with Retina display, Mac mini and Apple TV. These devices are low voltage HDMI sources and cannot provide enough power to the chipset through the HDMI slot. Another solution is to use HDMI to VGA with external power input.
- Length: 1.8 m.
- Colour: Black.
- Regulations: RoHS.
- Functionality Test: 100% tested.
