PHILIPS

Air humidifier

Series 3000i

- Up to 47 m²
- High water absorption
- Personalized aroma dispenser
- App connected

HU4908/00

Hygienic and scented humidification

with NanoCloud technology

Replace the discomfort of dry air in style with a refreshing hydrating experience and pleasant scent. Philips Humidifier Series 3000i only emits Nano-sized water molecules that spread evenly in the air and protect your skin from dry air.

Hygienic humidification with NanoCloud technology

- Natural evaporation process
- Prevents wet spots and white dust*
- Spreads 99% less bacteria*

Designed for you

- Real time numerical indoor humidity level feedback
- Premium design complements home decor
- Personalized aroma dispenser
- 3 fan speeds
- Easy-clean & fill water tank

Smart controls

- Automatic humidity settings
- Quiet sleep mode
- Timer
- Track, monitor and control with your smartphone app

Highlights

Natural evaporation process
NanoCloud technology is a hygienic and natural evaporation process that ensures optimized performance. As dry air passes through the humidifier, it adds water vapor and emits humid air into your home. This humidifier emits only nano-sized water molecules that spread evenly in the air and drive away dry air which might cause dry skin.

No wet spots & white dust

With its 360° design, humidified air is evenly distributed throughout the room, with no drips on the floor or desktop. Our NanoCloud technology also reduces the spread of minerals into the air, which prevents white dust from settling onto your furniture and flat surfaces.

Spreads 99% less bacteria*
Once the water is evaporated, the water molecules are so small that the water mist becomes invisible to human eyes. And because they are so small, these molecules are less able to carry bacteria into the air. Our laboratory testing confirms that NanoCloud technology spreads 99% less bacteria than leading ultrasonic humidifiers.

Real time humidity level
The numerical humidity level feedback effectively provides real time indoor humidity feedback.

Premium design
Its elegant and subtle design easily complements any home decor. In addition to the advanced humidification, it can make your home feel refreshingly stylish.

Aroma dispenser

You can choose your favorite scents with the aroma dispenser, which refreshes your home with pleasant aromas. Add drops of your own essential oil on the aroma pad to create refreshing air as well as a pleasant SPA-like atmosphere in your home.

3 fan speeds

Choose from three different fan speeds on your Philips humidifier, with a humidification rate of 320 ml/h on its highest setting. Perfect for medium-sized rooms up to 47 m².*

Easily clean & refill tank

A semi-open and transparent design makes cleaning a breeze. Fill the tank with a jar or under your water tap. The 'max' indicator shows when the tank is full.

Automatic humidity settings
Maintain a constant humidity level with the automatic humidity settings. Choose 40%, 50%, or 60% as your target humidity level and the humidifier will automatically turn on or off to reach the desired humidity level. Smart Humidity sensor enables the appliance precisely manages the humidity level. It also gives real time numerical room humidity rate level.

Quiet sleep mode

In sleep mode, the humidifier runs at minimum noise level and all lights are off except for the speed indicator. This setting ensures you can maintain your desired humidity level even when you are sleeping.

Automated timer
Use the humidifier's timer for it to operate for a set number of hours. Then it will automatically switch off when the time has elapsed. Choose from 1 to 12 hours of run time.

Control anytime, anywhere
Use the JD Wei Lian app to control your air purifier from anywhere, anytime. Check the humidity level with the app to get reassurance wherever you are. You can also change the fan speed, set a schedule and check the filter status. With a Dingdong smart home speaker, you can also control your humidifier with your voice commands.

Specifications

Performance
Room size: Up to 47 m²
Humidification rate: 320 ml/h

Features
Modes: Auto, Sleep
Fan speed: 3

Design and finishing
Control panel type: Touch
Material of main body: HIPS

Technical specifications
Voltage: 220 V
Frequency: 50/60 Hz

Country of origin
Made in: China

Sustainability
Packaging: > 90% recycled materials
Stand-by power consumption: <0.5 W
User manual: 100% recycled paper

Service
2-year worldwide guarantee

* Prevents wet spots and white dust: Independent third-party test Determination of deposition of minerals from liquid droplets on furniture according to DIN 44973, IUTA e.V. To determine mineral deposits onto furniture from airborne liquid droplets over a period of 3 hours.
* Room size is calculated based on humidification rate tested by third party lab, following AHAM HU-1-2006 (R2011)
* Results are based on emission of the bacterium Pseudomonas Fragi from clean units and filters, after 1,6 and 24 hours of continuous use, varying in water consumption from 30-120ml/hr, using sterilized water spiked with said bacterium, conducted in a 1m3(35cuft) chamber refreshed at 560L/min
