AEG

Gas on Glass Hob 90 cm

HKB95540NB

More confidence in the flame
The AEG gas hob with FlameLight adds a new level of safety and confidence to cooking with gas. The bright LED lights tell you at a glance if a burner is turned on or off, and if a pan support is still hot after use. So you can concentrate on making great-tasting food.

The AEG gas hob with FlameLight adds a new level of safety and confidence to cooking with gas. The bright LED lights tell you at a glance if a burner is turned on or off, and if a pan support is still hot after use. So you can concentrate on making great-tasting food.

Product Benefits & Features

Heat indicators for instant information
No more guessing if your burners are turned on or off. FlameLight LED indicators let you clearly see at a glance if the knobs are turned on or off. And a useful residual heat indicator offers instant visual feedback on whether any pan supports are still hot.

- Gas on glass hob
- Steel capped control knobs
- Rotary front controls on glass panel
- Rotary controls
- Cast iron pan supports
- Automatic integrated ignition
- Safety gas cut off using thermocouples
- Front left burner: Semi-rapid 2kW burner

Warning buzzer if flame is left on
With this hob, you will never leave the gas on again. If a control knob is turned on for a long period, it will cause a buzzer to sound, reminding you that you need to turn off the flame.

Timer allows greater control
The hob comes complete with a convenient minute minder, allowing you to monitor the progress of your cooking and always stay in absolute control of the flavours you're creating.

The hands-free hood
This gas hob is uniquely equipped with Hob2Hood. This feature enables you to switch on your cooker hood and lights as you start cooking on your hob. You can even use the hob to regulate the fan. Keeping your hands focused on your cooking.

Boost the heat for instant results
The 4 kw powerful wok burner generates maximum heat through the triple crown burner so your cooking gets faster. Heat and speed are vital ingredients in ethnic cuisine. The wok burner generates a surge of extra power when you need it.
