# Highlights

### Integrated vacuum system

Trim your beard, mustache and sideburns while keeping tidy with this trimmer. Its powerful vacuum catches cut hair as you go along, giving you a mess-free trim.

### Innovative lift & trim system

Trim your stubble in one quick stroke. Our innovative lift & trim system raises hairs then guides them to the double-sharpened stainless steel blades. The result is an even stubble or trim in just one go.

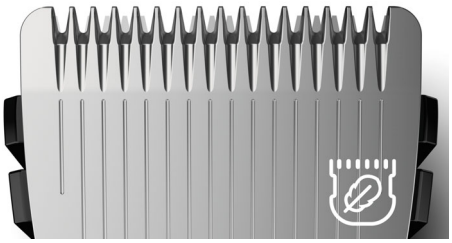
### Double-sharpened blades

Strong steel blades are double-sharpened and made to last a very long time to cut through even thick hair. They sharpen themselves by lightly brushing against each other as you trim.

### 20 lock-in length settings

Select your preferred trim length by simply turning the zoom wheel on the handle until the length you want is displayed from 0,5 - 10mm with 0,5mm precision. Your chosen length is now "locked in" for a perfectly even trim.

### Skin-friendly blades



Get a perfect yet protective trim, time after time. The beard trimmer's steel blades lightly brush against one another, sharpening themselves as they trim so they stay extra sharp and effective. They also have rounded tips and combs to help prevent skin irritation.

### Corded and cordless use

Charge your beard trimmer for 1 hour to get 60 minutes of cordless use. If you need more energy while trimming, you can simply plug the trimmer into the wall. This trimmer has been designed to run both cordless and plugged in.

### Battery indicator

The battery indicator shows when your trimmer is charged, charging, or when it needs to be plugged in.

### Easy to clean

Once you are done, simply rinse the blades and comb under the tap, empty the hair chamber and brush away any loose hairs with the added cleaning brush for long-lasting performance.

### Built to last

We back this Philips trimmer with a 2-year guarantee: our grooming products are built to last. You'll never need to oil it, and it's compatible with all worldwide voltages.
