AEG

LX5 Bagless Canister

LX5-2-4T

From corner to corner, thoroughly
This bagless vacuum cleaner is built to use less energy and features an effective dust filtering system. Great cleaning performance for a clean home, every single time.

This bagless vacuum cleaner is built to use less energy and features an effective dust filtering system. Great cleaning performance for a clean home, every single time.

Product Benefits & Features

Air-tight and energy-efficient
The LX5 vacuum cleaner has an air-tight design. This minimises the energy required for highly effective cleaning.

Filtered for great performance
LX5's 4-step system effectively separates dust particles for powerful cleaning performance. The filters last longer, and the need to replace or clean them is minimised.

More power for longer
The new LX5 design combines longevity with great performance. Vacuum for twice* as long at high performance without having to regularly empty the container.

*Compared with LX5-1 on clogging performance and suction power.

Made with more capacity
The high-capacity dust container can store up to 1.8 litres, so it requires emptying less often. Single button release to carefully dispose your dust in an effortless way.

Large wheels for enhanced stability
The large rotary wheels on the LX5 vacuum cleaner improve stability around the home.

- Sliding power control
- Soft wheels
- Parking clip side and back
