Philips DryCare Advanced Dryer

ThermoBalance sensor

Ionic
2200W

BHD186/00

Active heat protection, for shiny healthy hair

Our ThermoBalance sensor automatically senses and adjusts the air temperature as you dry your hair. This constant regulation prevents hotspots that create dryness, resulting in 22% more shine*.

Beautifully styled hair
- 3 heat and 2 speed settings for full control
- Cool Shot sets your style
- Slim airflow concentrator for a perfect brushing
- 2200W of fast, high performance drying power
- Massaging diffuser to maximize volume & boosts curls
- Turbo boost for extra fast drying

Easy to use
- 1.8m cord for maximum flexibility
- Easy storage hook for convenient storage

Less hair damage
- Ionic conditioning for shiny, frizz-free hair

ThermoBalance Sensor
- Healthier drying with continuous temperature control

Highlights

ThermoBalance Sensor

The ThermoBalance sensor is an innovative technology that provides active protection for your hair. The sensor continuously measures and adjusts the air temperature to make sure your hair dries fast and stays healthy. When the ThermoBalance sensor is activated, the LED light turns on. You'll feel pleasant, constant temperature changes: these fluctuations prevent hotspots which can over-dry and damage your hair. With the ThermoBalance sensor, your hair cuticles and scalp are constantly and actively protected from overheating.

2200W of power

This 2200W professional hairdryer creates a powerful airflow. The resulting combination of power and speed makes drying and styling your hair quicker and easier.

Cool Shot sets your style

A must-have professional setting, the Cool Shot provides a burst of cold air. Use after styling to set and finish your style.

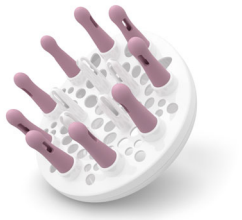
Accurate control

Easily set and control the heat and speed settings to create the perfect style. Choose from 3 heat and 2 speed settings for full control and precise drying and styling

11mm narrow concentrator

The slim styling nozzle concentrate the flow of hair through the 11mm opening for precision styling on specific areas. Great for touch ups or to set your style.

Massaging diffuser



The asymmetric massaging diffuser has a unique asymmetric design that is contoured to the head, making it easier and more intuitive to use. The diffuser spreads the flow of air across the hair, drying hair more healthy, boosting volume and reducing frizz. The rubber pins can be used to massage and stimulate the scalp and improve hair vitality. For best results, hold close to the crown and root area and let the diffuser's massaging pins add bounce and shape curls.

Turbo boost

The turbo boost button increases the airflow, to dry your hair even quicker.
