Fun entertainment on the go

Great for music, movies & photos

It's entertainment galore on the go with the Philips GoGear Lite MP4 Player, featuring MP4 and WMA playback, and 1.8" color screen for easy navigation and fun photo viewing. Comes with a handy voice recording function and MicroSD slot.

For superb music and video enjoyment
- MP3 and WMA playback
- Watch your favorite videos on the go

Complements your life
- 4.6 cm/1.8" full color screen for easy, intuitive browsing
- Enjoy video files in 160x128 pixels resolution
- Enjoy up to 9-hour music playback
- FM radio with 20 presets for more music options
- Voice recording to take notes or record anything, anytime

Easy and intuitive
- microSD card slot for expanded memory of up to 32 GB
- Folder view to organize and view media files like on your PC

PHILIPS

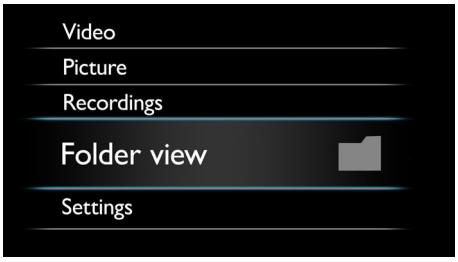

Highlights

Voice recording

Voice recording converts your GoGear player into a handy dictation machine. Besides playing music or listening to radio, you can also record notes or reminders for work or school, record shopping lists and phone numbers – even song lyrics. By pressing the recording button and speaking into the built-in microphone, voice messages are compressed and stored in the built-in internal memory. Voice recording gives you a highly portable voice recorder allowing you to record anything, anytime and anywhere!

Folder view

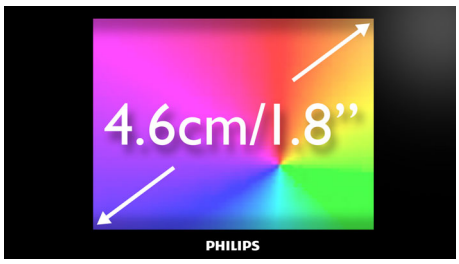

Folder view is an optional directory view of the GoGear player that lets you view all the files on your player as if it were a computer. Once you select Folder view, opening any supported file (i.e. music, pictures or videos) is as easy as selecting the file and hitting Play.

160x128 pixels

Enjoy video files in 160x128 pixels resolution

4.6 cm/1.8" full color screen

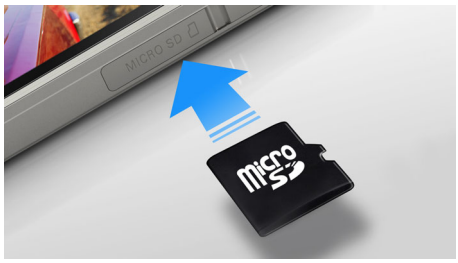

A 4.6 cm/1.8" full color screen allows you to easily navigate the control menu and browse through the music files on your GoGEAR player.

FM radio with 20 presets

Digital FM radio offers you additional music options to your music collection on your GoGear. Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. You can preset up to 20 radio stations and enjoy your favorite programs whenever you go.

microSD card slot

Small is beautiful when it comes to mobile devices, but not to memory capacities. With GoGEAR player, you can have the best of both worlds just by plugging a microSD card in. The microSD card will show up as a second removable drive when the player is connected to your computer for file transfer. You can purchase a card with up to 32 GB of memory to expand your GoGEAR's capacity. Then simply load the card with the desired content, plug it into your player – and never have to worry about running out of entertainment choices again.

MP3 and WMA playback

Audio compression technology allows large digital music files to be reduced up to 10 times in size without radically degrading their audio quality. MP3 or WMA are two of the compression formats that let you enjoy a world of digital music on your GoGear player. Download MP3 or WMA songs from authorized music sites on the Internet or create your own MP3 or WMA music files by ripping your audio CDs and transferring them onto your player.

Up to 9-hour music playback
