Highlights

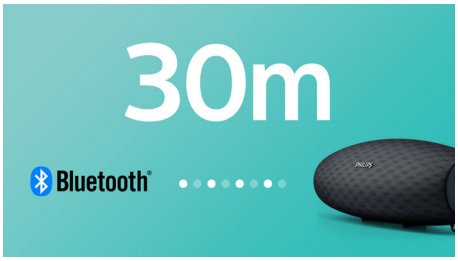
Digital Sound Processing

Advanced sound processing technology enhances the reproduction of your music so that each note resonates with crystal-clear accuracy and each pause is sealed with pristine silence. Philips' proprietary Digital Sound Processing technology optimises the performance of compact speakers, delivering sound that is clear, detailed and powerful without any distortion.

Wireless music streaming

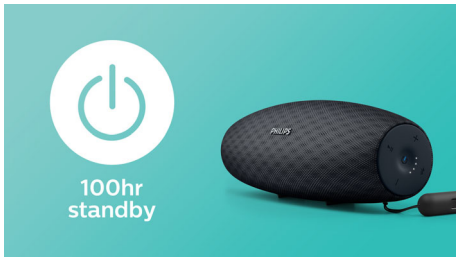
Bluetooth is a wireless communication technology that is both robust and energy-efficient. The technology allows easy wireless connection to iPod/iPhone/iPad or other Bluetooth devices, such as smartphones, tablets or even laptops. So you can easily enjoy your favourite music and sound from videos or games wirelessly on this speaker.

30 m Bluetooth range



Move freely around with your smart phone, without worrying about dropping your music. EverPlay speaker offers an incredibly stable and long range Bluetooth connection up to 30 metres or 100 feet, three times faster than industry standards. The speakers are equipped with a sensitivity antenna and radio frequency filter to minimise background interference.

100 hr standby time

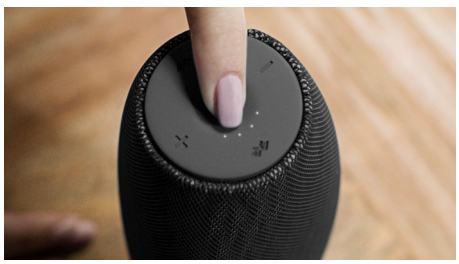


EverPlay's intelligent standby mode gives you an incredible 100 hours of standby time and the speaker can be woken from power-off mode simply by your smart device.

Quick charging

Charging the speaker usually takes quite some time. EverPlay offers a quick-charge option that can recharge the speaker three times faster than a normal USB adapter. By using a Qualcomm Quick-Charge adapter (not included), which is commonly used in new Android phones, to charge the speaker, the charging time is much faster.

Battery indicator



Finally, a Bluetooth speaker that provides a simple, clear way to see how much remaining power you have! With EverPlay, simply push the power button to see how much battery is left.

Durable build

EverPlay speaker is super durable and features dust, shock and water resistance. Dust cannot interfere with the operation of the speaker. And it is able to withstand immersion in water up to 1 metre for up to 30 minutes. This means that a session in the shower, getting caught in the rain or a quick drop into a body of water will not cause damage. Under Shockproof designation, this product is tested in a "Torture Chamber" to undergo a roller swing test with simulated 5-year product life-time reliability. EverPlay is truly durable!

DuraFit Fabric

The DuraFit fabric covering the speaker provides both functional and aesthetic benefits. With upper rubber overlays covering a matching accent-coloured cloth, the anti-slip, scratch-resistant and washable material offers additional protection, while the unique rhombus mesh pattern also gives it a more modern, sophisticated style.
