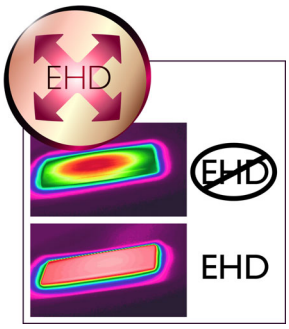
Highlights

Specially designed for Asians

Specially designed for Asians

EHD+ technology



Advanced Philips EHD+ technology means that your dryer will always distribute the heat very evenly - even at high temperatures, and prevents damaging hot spots. This gives added protection and thus helps to keep your hair healthy and shiny.

ThermoProtect temperature

The ThermoProtect temperature provides the optimal drying temperature and gives additional protection from overheating the hair. With the same powerful airflow, you will get the best results in a caring way.

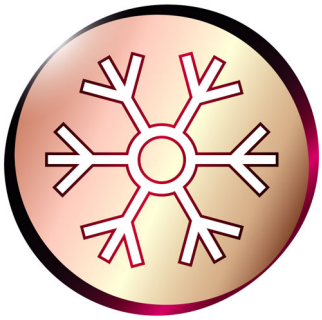
Six flexible speed and temperature settings

The speed and heat required can be easily adjusted to create the perfect style. Six different settings ensure full control for precise and tailored styling.

100% more Ions

100% more Ions for ultimate shine

Coolshot

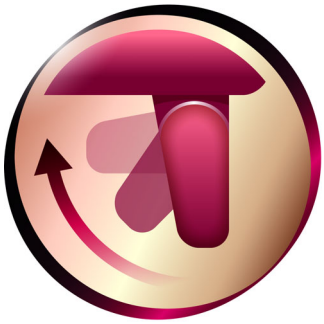


Coolshot for seal in shine and fix your style

Compact design

Compact and ergonomic, this hairdryer benefits from a clever modern design. This results in a dryer that is light and easy to handle yet small enough to store virtually anywhere.

Foldable handle

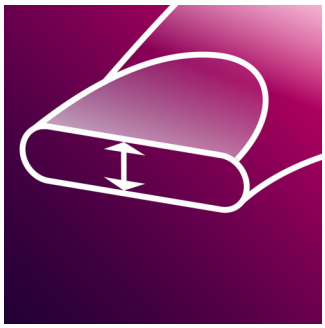


This hairdryer benefits from a foldable handle. The result is a small, compact hair dryer that will easily pack into the smallest spaces and you can take virtually anywhere.

Easy storage hook

The rubberised hook is located at the base of the handle and provides another storage option, particularly convenient for use in the home or when staying at a hotel.

Narrow concentrator



The concentrator of the hair dryer works by focusing the flow of air through the opening onto specific areas. This results in precise styling and is great for touch ups or to finish a hair style.
