- 3 flexible pre-selected drying settings for different needs
- Foldable handle for easy storage

Hair care technology
- SPA Technology for superior hair & scalp care

PHILIPS

Hairdryer
1600W SPA Technology, Ionic

BHC111/49

Highlights

1600W efficient drying

This 1600W hairdryer creates the optimum level of airflow and gentle drying power, for beautiful results every day.

3 pre-selected drying settings

This compact hair dryer offers you 3 pre-selected heat & speed setting for cool, caring or quick drying.

Concentrator

The concentrator works by focusing the flow of air through the opening onto specific areas. This results in a quick drying and more precise styling.

Foldable Handle

This hairdryer benefits from a foldable handle. The result is a small, compact hairdryer that will pack easily into even the smallest spaces and that you can take virtually anywhere.

SPA Technology

SPA, Soft Protective Airflow, is designed to provide efficient and comfortable scalp and hair drying. Thanks to its patented EHD (Even Heat Distribution, NO. CN102143697A) air outlet design, SPA technology helps to create an optimal balance between evenly distributed heat and softened airflow, which enables you to easily upgrade your drying process to a soothing SPA experience. SPA technology with 1600W power, dries faster*, wider* in a gentle way which ensures thorough drying result with less discomfort and hot spot on scalp or hair.

Wide angle ionic care

Give your hair an instant care with ionic conditioning. Negatively charged ions eliminate statics, condition the hair and smooth down the hair cuticles. With SPA Technology, the drying area and thus the ionic flow is wider* and evenly distributed to intensify the hair's shine and glossiness.

Specifications

Technical specifications
- Wattage: 1600 W
- Cord length: 1.5 m
- Voltage: 220 V

Features
- Foldable handle
- Storage hook

Service
- 2-year guarantee
