VX7-2-DB Canister

Silence Pro System™ for a more quiet clean

Clean without the noise. The VX7 has been built with silence in mind. A noise-optimized motor, together with the construction of the canister and the new Dust Magnet™ silent nozzle ensure a more quiet clean – without compromising on performance.

360° Motion Technology™ to easily reach around corners

All the small things we have in our homes give us a homey feel, but also make it hard to clean. That's why the the VX7 is equipped with small rotating wheels that are ideal for vacuuming around objects and reaching otherwise hardly accessible areas with ease.

More Benefits :

• Multi Room System™ for an effortless clean in one go

Features :

• Extremely silent
•Sliding power control
•Side angled brushes for edge cleaning
