# Ultra Slim 4K UHD LED Android TV

## with Ambilight 3-sided

Dive into your favourite content with the Philips 8300 NanoLED TV. Experience vibrant, lifelike colour and a sharp 4K UHD picture, even when you're facing the TV at an angle. Make movie and game nights feel more immersive with Ambilight.

### Benefits

#### Refined design. Beautiful light.

- Ultra-slim minimalist frame with brushed aluminium finish
- Ambilight. Take the emotion beyond the screen.
- Wide colour gamut. More colours. More vibrancy.

#### Incredible moments

- IPS Nano Color. Rich colour. No matter where you sit.
- Philips P5 Engine. Whatever the source, always perfection.
- HDR Premium. Enhanced colour, depth, and dimension

#### Android TV-all the content you love

- Google Assistant built in. Content and more at your command
- Google Play store and Philips app gallery. More to love.

#### Crisp audio

- Philips Triple Ring technology. More space for sound
- DTS HD Premium Sound. Deep bass and crystal-clear dialogue

### Features

#### Ultra-slim minimalist frame

#### IPS Nano Color

From movie night to the big match or gaming, IPS Nano Color technology delivers vibrant colour and a wide viewing angle. Uniform, nanometre-sized particles absorb any excess light created by the screen. Reds stay red, green

PHILIPS

grass looks green, and blue is always blue. Even if you're facing the TV at an angle of up to 60 degrees.

### P5 Perfect Picture Engine

The Philips P5 Perfect Picture Engine delivers an image as brilliant as the content you love. Details have noticeably more depth. Colours are vivid, while skin tones look natural. Contrast is so crisp you'll feel every detail. And motion is so smooth that you'll never lose sight of the ball, no matter how fast the play.

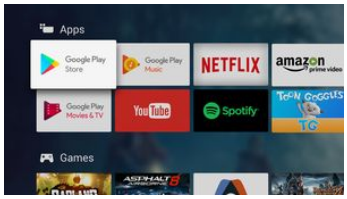
### High Dynamic Range Premium

High Dynamic Range Premium is a new video standard. It redefines in-home entertainment through advances in our application of contrast and colour. Enjoy a sensory experience that captures the original richness and liveliness, yet accurately reflects the director's intent. The end result? Highlights with excellent brightness, richer contrast and colour and vivid details like you've never seen before.

### Google Assistant built in

Control your Philips Android TV with your voice. Want to play a game, watch Netflix or find content and apps in the Google Play store? Just tell your TV. You can even command all Google Assistant-compatible smart home devices, like dimming the lights and setting the thermostat on movie night. Without leaving the sofa.

### TV Content



Go beyond traditional TV programming with Google Play Store and Philips App Gallery. Experience endless movies, TV, music, apps and games online. More to love.

### Triple Ring technology

With enhanced Philips Triple Ring technology, we have even more powerful speaker movement in our subwoofers. More movement means more punch- so you will enjoy powerful sound even in our thin Philips TV design.

### Ambilight 3-sided

With Philips Ambilight, movies and games feel more immersive. Music gets a light show. And your screen will feel bigger than it is. Intelligent LEDs around the edges of the TV cast on-screen colours onto the walls and into the room, in real time. You get perfectly tuned ambient lighting. And one more reason to love your TV.

### Wide Colour Gamut

Wide Colour Gamut increases the standard colour gamut from 72% to 90%–99%, resulting in more vivid and brilliant colours. The greenest green, the bluest blue and the reddest red, the expanded colour reproduction abilities of a 4K Ultra HD TV are closer than ever to what we see in a digital cinema.
