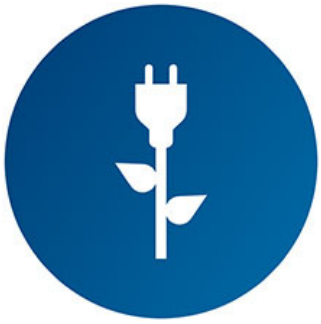
With its beautiful design and familiar shape, this energy-saving LED lamp is the perfect sustainable replacement for traditional incandescent lamps.

Long life bulbs

With a lifetime of up to 10,000 hours, you can reduce the hassle of frequently replacing your lamps and enjoy a perfect lighting solution for over 10 years.

Saves up to 80% energy



LED technology saves up to 80% energy compared to your standard bulb. It therefore pays for itself and saves you money year after year. It also helps to protect the environment.

Learn about light

Colour temperature: light can have different colour temperatures, indicated in units called Kelvin (K). Lamps with a low Kelvin value produce a warm, more tranquil light, while those with a higher Kelvin value produce a cool, more energising light. CRI: the colour rendering index (CRI) is used to describe the effect of a light source on colour appearance. Natural sunlight has a CRI of 100. The CRI of Philips LED lamps is always higher than 80, which ensures that colours are shown as true and natural.
