Giving light a new experience

Follow the trend of minimalism with this gorgeous white ceiling light. It adds soft but striking accents to your living space with powerful warm white LED light. You can dim the light for a stunning ambience in your home.

Benefits

Elegant design meets innovative technology

- Fusion between light and design

High-quality light

- Warm white light
- Diffused light effect
- Adjustable light intensity with dimmer switch

Sustainable light solutions

- Extremely long operating life
- Saves up to 80% energy

Features

Light and design

This design lamp has light with a minimalist essence that defies traditional boundaries, creating light and light forms of inspiring purity and beauty.

PHILIPS

Warm white light

This light uses the very latest lighting technology by Philips with the new warm white state-of-the-art high power LEDs providing a glow of light with a colour temperature of 2700 Kelvin.

Diffused light effect

The diffused light of the Philips lamp will illuminate your room with warm white light, allowing you to combine functionality and respect for the environment.

Dimmable

Adjust the light intensity of the Philips LED lights with a dimmer switch (not included). This makes this light ideal for creating an ambience for any occasion, whether a cosy meal à deux or chilling out with family and friends in your living room. Philips tested a number of wall dimmers that have proved to be compliant with our LED lights. A list of compatible dimmers is available in the downloads and support section.

Extremely long operating life

A light source you can trust. Philips LED lights offer an extremely long life of at least 20.000 hours (which equals 20 years on basis of an average use of 3 hours a day with an amount of at least of 13.000 on/off switching cycles). With the Philips LED lights you won't have to worry about maintenance or lamp replacement while having the perfect light ambience in your home.

Saves up to 80% energy

The LED lighting technology used in Philips lighting fixtures is highly energy-efficient (7.5 W module produces 350 Lumen). As a result, every lighting fixture conserves energy, helping consumers to save money on their electricity bills and contribute to preserving the environment. For home lighting that's energy-efficient and provides great light in a range of contemporary designs, look for Philips LED products.

Specifications
