Highlights

Twin TurboStar technology

By combining a powerful heater and motor with our new Twin TurboStar technology, the hot air in the Airfryer swirls like a powerful tornado – throughout the entire cooking basket. Designed to extract more fat from your food and capture it all in the fat reducer for easy disposal. Philips Airfryer with Twin TurboStar technology also saves you and your home from the smell of fried oil compared to a regular fryer.

Fry with little or no oil

The Airfryer uses hot air to cook your favorite foods with little or no added oil, so you can fry with up to 90% less fat*. Enjoy great-tasting, crispy results like deep fried, with the least amount of fat.

Crispy taste & 90% less fat

Proven performance. Make fries that are just as crispy as a traditional deep fryer with up to 90% less fat* in them. Roast chicken drumsticks for crispy skin and tender meat while removing fat.

Presets popular dishes

We created four preset programs for the most popular dishes, so you can cook them with just one click. You'll enjoy the ease of our preset programs for frozen fries, meat, fish and drumsticks.

Inspiring recipes

The Philips Airfryer app is free and filled with delicious recipes and easy to follow step-by-step cooking instructions. Get inspired with quick, healthy snacks or meals for special occasions.

QuickControl dial

The new QuickControl dial is your main Airfryer control. Just turn it to set the right temperature, then click. Turn again to set the time – then click to start cooking.

Keep Warm for flexible serving

The Keep Warm function lets you serve the food when you are ready for it. You can keep your dish warm up to 30 minutes.

Versatile cooking

Not just great for frying, the innovative Philips Airfryer with TurboStar technology also lets you grill, bake and even roast your favorite dishes for a one stop solution for all of your meals.

Compact size, big capacity

You don't need a lot of space for an Airfryer. The new Philips Airfryer is 20%* more compact – but cooks the same amount of food that it always has. That's 0.8kg of fries, up to 4 portions. So you can easily keep it on your kitchen countertop, and use it everyday.
