PHILIPS

MoistureProtect Hairdryer

DryCare Prestige

- MoistureProtect technology
- 2200W drying power
- Ionic care for shiny hair
- Vibrating scalp massager

HP8283/05

Beautiful hair protected inside and out

Boosts shine and preserves hair's natural moisture

The MoistureProtect Hairdryer has an infrared sensor which continually measures the optimal temperature to dry your hair, preserving its natural moisture. Includes a scalp massager to stimulate the natural flow of nutrients to your hair.

MoistureProtect technology

- MoistureProtect technology preserves hair's natural moisture
- Intelligent MoistureProtect sensor

Caring technology

- Ionic care for smooth, frizz-free, shiny hair
- ThermoProtect prevents your hair from overheating

Vibrating scalp massager

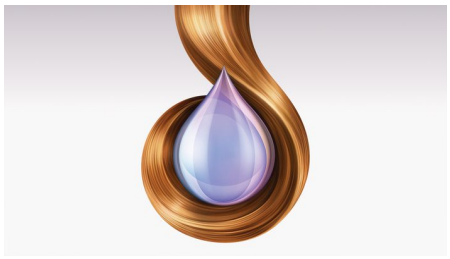
- Vibrating scalp massager to relax and stimulate your scalp
- Easy to use scalp massager to relax and stimulate your scalp
- Ergonomic shape for better handling experience
- Smooth rounded bristles for gentle scalp massage

Ease of use

- 2200W of fast, high performance drying power
- Six speed and heat settings for optimal control
- Cool shot to set your style

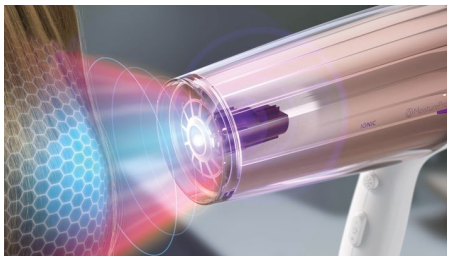
Highlights

MoistureProtect technology



MoistureProtect technology controls and adapts the temperature to boost shine and to preserve your hair's natural moisture. Protects your hair from overheating by always ensuring the optimal temperature. Enjoy beautiful hair protected inside and out.

MoistureProtect sensor



The infrared MoistureProtect sensor continually monitors and adapts the drying temperature to match the needs of your hair. The intelligent sensor measures your hair's temperature while you dry your hair, to prevent moisture loss and cuticle damage. Keeping the moisture in your hair means it will be softer, shinier and healthier. You can switch the sensor on/off depending on your needs.

2200W drying power

This 2200W professional hairdryer has six speeds and heat settings. The resulting combination of power, speed and technology makes drying and styling your hair quicker, easier and gentler.

Ionic care

Charged negative ions eliminate static, condition the hair and smooth down the hair cuticles to intensify the hair's shine and glossiness. The result is hair that is smooth, shiny and frizz-free.

Vibrating scalp massager

Stimulate the natural flow of nutrients to your hair by using the vibrating scalp massager. The soft vibrating bristles help to stimulate microcirculation, carrying oxygen and nutrients. These natural nutrients contribute to the health of your hair, while gently relaxing your scalp.

Easy to use scalp massager

Gently place the massaging bristles on your scalp in an area where you feel tension, without putting pressure. Relax and slowly rotate around the area in a circular motion, or stay in one spot to ease the tension. Use the on/off button to choose one of the 3 vibration speed settings. Batteries are included so you can immediately enjoy a relaxing and healthy scalp massage.

Ergonomic shape

Philips designs around you. The seamless ergonomic shape fits perfectly in your hand, ensuring an ideal handling experience.

Smooth rounded bristles

The bristles of the scalp massager have smooth and well-rounded tips to protect as well as gently massage your scalp.

ThermoProtect temperature

ThermoProtect temperature ensures the perfect drying temperature for your hair. A powerful but gentle drying experience providing optimal results in a caring way.

Specifications

Technical specifications
