

Cordless phone

- 30-min answering machine
- 1.7" display/white backlight
- Speakerphone
- 2 handsets

D6052B/05

Rich set of features

Outstanding sound quality of HQ-Sound meets ergonomic and modern design. With large, full-colour display and rich set of features like keypad backlight, privacy settings, baby monitor and answering machine, this phone has all that you need.

Benefits

As simple as ever

- High-contrast 4.3-cm (1.7") TFT colour display
- Baby monitor alerts you when baby needs your attention
- Keypad backlight for fast access even in dark rooms
- Textured back cover for non-slip grip
- Privacy settings: call barring, silence mode with filtering
- Up to 18 hours talk time
- Up to 30 min. message on your answering machine

Exceptional sound

- Full-duplex echo cancellation ensures a smooth conversation
- Freestanding handset with a speaker for easy hands-free calls
- HQ-Sound: high quality acoustic engineering for superb sound
- MySound profiles to match your sound preference

Eco-conscious product

- Low radiation (ECO and ECO+ modes) and power consumption

PHILIPS

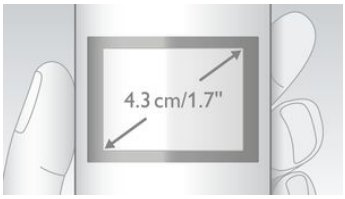

Features

Full-duplex echo cancellation

Natural conversation does not involve taking turns — there is always some natural overlap. Now, thanks to our full-duplex echo cancellation, you can hear perfectly, even if you are both talking at the same time.

4.3-cm (1.7") TFT colour display

Baby monitor

Receive an alert when your baby needs you. Just place the DECT handset in the baby's room and receive an alert on your base or on another DECT phone (i.e. another landline number) or mobile phone (when you're out) when the baby starts to cry.

Eco-conscious model with ECO+

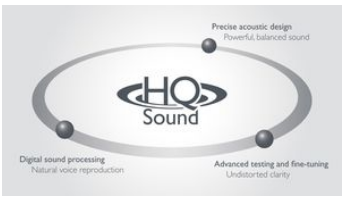

Philips phones are energy efficient and designed to be respectful to the environment. When ECO mode is activated, the emitted radiation is reduced by up to 60%, and up to 95% when the phone is charging. With ECO+ mode activation, the radiation drops to zero.

Handset speakerphone

Hands-free mode uses a built-in loudspeaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

HQ-Sound

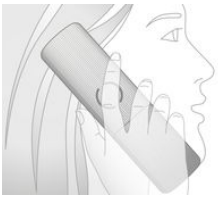

Philips cordless phones with HQ-Sound build upon decades of experience and breakthrough innovations in developing Hi-Fi audio products and high-end headphones to deliver excellent voice clarity on our DECT phones. When it comes to improving sound quality, our acoustics engineers and architects have thought of everything – high-quality components, digital signal processing, precise acoustic design, advanced testing and fine-tuning. The result is sound that is crisp, clear and authentic. Sound so good and natural, it is almost like being there in person.

Keypad backlight

The soft amber backlight makes keys easy to read in low light conditions and at night.

Non-slip grip

The rear of the handset is treated with a special texture for added comfort and better grip.

Privacy modes

Value your privacy and quiet at home? Easily disable the ringtones for specific "no call" times to enjoy peace and silence. An additional filtering function allows the ring still to sound when you receive a call from any number chosen from the phone book, making sure that only the "right" people can reach you. Thanks to call barring you can avoid expensive phone bill surprises by blocking calls to specific numbers, numbers starting with certain digits (for example pay-per-call numbers) or specific area codes.

Up to 18 hours talk time

Up to 30 min. recording

With up to 30 minutes recording time, you'll never miss an important message.

MySound profiles

Sound perception is subjective, and everyone has their own listening preference. MySound brings personality back to every conversation by allowing you to choose the audio profile that best matches your sound preferences: Clear—to make voices sound crisper and clearer; Soft—for friendly, softer tones; Warm—to make voices sound welcoming and warm.
