

Cordless phone with answering machine

- 25-min answering machine
- 1.8" display/amber backlight
- Speakerphone
- 2 handsets

D4052W/05

Comfortable and convenient

With a curved shape for in-call comfort and the natural voice reproduction of HQ-Sound, relaxed conversations are effortless. Useful features like a large, full graphic display and backlit keypad make staying in touch even easier.

Benefits

As convenient as it should be

- Large 4.6-cm (1.8") full graphical display
- Contoured handset design for in-call comfort
- Textured back cover for non-slip grip
- Silence mode for more privacy
- Up to 16 hours of talk time on a single charge
- Up to 25 minutes of messages on your answering machine
- Caller ID – so you always know who is calling*
- Keypad backlight for fast access even in dark rooms

Exceptional sound

- Freestanding handset with a speaker for easy hands-free calls
- HQ-Sound: high quality acoustic engineering for superb sound
- MySound profiles to match your sound preference

Eco-conscious product

- Low radiation (ECO and ECO+ modes) and power consumption

Features

4.6-cm (1.8") graphical display

Contoured handset design

Designed for maximum in-call comfort, the handset fits naturally against the curve of your face.

Eco-conscious model with ECO+

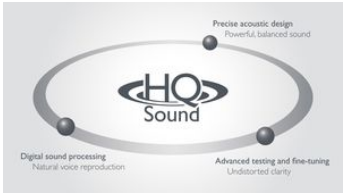

Philips phones are energy efficient and designed to be respectful to the environment. When ECO mode is activated, the emitted radiation is reduced by up to 60%, and up to 95% when the phone is charging. With ECO+ mode activation, the radiation drops to zero.

Handset speakerphone

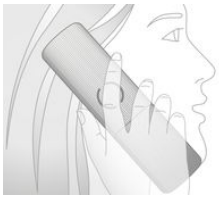

Hands-free mode uses a built-in loudspeaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

HQ-Sound

Philips cordless phones with HQ-Sound build upon decades of experience and breakthrough innovations in developing Hi-Fi audio products and high-end headphones to deliver excellent voice clarity on our DECT phones. When it comes to improving sound quality, our acoustics engineers and architects have thought of everything – high-quality components, digital signal processing, precise acoustic design, advanced testing and fine-tuning. The result is sound that is crisp, clear and authentic. Sound so good and natural, it is almost like being there in person.

Non-slip grip

The rear of the handset is treated with a special texture for added comfort and better grip.

Silence mode

Value your privacy and quiet at home? Easily disable the ringtones for specific "no call" times to enjoy peace and silence.

Up to 16 hours talk time

Up to 25 min. recording

Caller ID*

Sometimes it's good to know who's calling before you answer. And our Caller ID lets you keep track of who's on the other end of the line.

Keypad backlight

The soft amber backlight makes keys easy to read in low light conditions and at night.

MySound profiles

Sound perception is subjective, and everyone has their own listening preference. MySound brings personality back to every conversation by allowing you to choose the audio profile that best matches your sound preferences: Clear—to make voices sound crisper and clearer; Soft—for friendly, softer tones; Warm—to make voices sound welcoming and warm.
