The more you dim, the warmer the light.

Philips WarmGlow LEDs let you dim your everyday light down to the cozy tones of traditional lamps. So the more you dim, the warmer the light appears. This sets them apart from standard dimmable LEDs, which simply get less bright when dimmed. WarmGlow lamps are now also enhanced with a Colour Rendering Index of 90, which is comparable to natural light, helping you see your home's true colours. Whether you're getting cozy on the sofa in the evening, or looking for a bright start to your day, Philips WarmGlow LEDs have the right light to suit your needs.
