

Car coaxial speaker

- 10.2 cm (4")
- 2-way
- 150W Peak

CSP415/00

Your mobile music theater

with 2-way stereo for vivid sound

Feel your music with the Philips Car stereo speakers CSP415. These 10cm 2-way speakers have peak power at 150W, and feature a light polypropylene cone with a soft PEI dome tweeter so you can enjoy vivid music details in clear sound.

Benefits

Vivid sound on the road

- 30W RMS power handling
- Light polypropylene cone for clear sound delivery
- Sensitive cloth surround for maximum sound details
- Soft PEI dome tweeter for warm and textured tones
- Strong ferrite magnet for high power performance

High durability, sustainable performance

- Endurance and performance stability in extreme conditions
- Sturdy polypropylene cone for all-weather performance
- Stylish speaker grille protects against damages

Easy to use and install

- Fits perfectly in all 10cm speaker openings
- Simple wires plug-in for designated speaker terminals

PHILIPS

Features

Light polypropylene cone

Inside the speaker, a diaphragm sits on top of a voice coil to produce a signal waveform once an input signal is received. It transforms the signal wave into a sound wave. Polypropylene is one of the lightest plastics ever invented and is great material for speaker diaphragms due to its weight, high strength, stiffness and tolerance for high temperatures. These polypropylene cones deliver high quality music by reacting to even the smallest sound signal to produce clear, vivid sound.

Sensitive cloth surround

A highly sensitive cloth connects the woofer diaphragm to the speaker frame to form a surround suspension system. When a sound signal reaches the cone inside the woofer, the cloth surround assembly brings the cone back into position to be ready to receive another sound signal. By doing so, the woofer can capture every signal with a minimum of distortion, giving you clear, smooth sound no matter how loud or how quiet the music is played.

Soft PEI dome tweeter

PEI (Polyetherimide) is ideal material for tweeter domes due to its light weight, high tensile strength, high stability and tolerance for high temperatures. Inside the tweeter, the small diaphragm (the dome opening) produces high frequency tones. These PEI domes can capture even the highest musical notes to make your music textured with warm, full-range treble. The dome shape also spreads the sound around so that you can hear the high notes from every seat in the car.

Stylish speaker grille

The speaker grille has been designed to give cars the look of luxury. Composed of two parts - a detachable metal mesh casing and a plastic ring, when installed over the speaker, it fully covers the tweeter dome and speaker cone. Hard and durable, it protects the speakers from accidental kicks and curious fingers, both of which can be damaging to their sound performance.

Strong ferrite magnet

Ferrite is a lightweight but strong material with a permanent and coherent magnetic field. It is the key speaker component that induces the movement of the voice coil and the diaphragm. When an input signal is received, the voice coil acts as an electromagnet that causes the woofer and tweeter diaphragm to either attract or repel. The ferrite magnet produces an even magnetic field for smooth diaphragm movement, ensuring sound output with lower distortion. Using such a stable and highly coercive magnet like ferrite, the voice coil can produce loud sounds while keeping the tone smooth.

Specifications

Please note that this is a pre-sales leaflet. The contents of this leaflet reflect the best of our knowledge per date and country mentioned above. The contents of this leaflet are subject to change without notice. Philips does not accept any liability as to the contents of this leaflet.

Sound

Output power (RMS)	30W
Peak Music Power	150W
Sensitivity	88dB
Frequency response	50-30k Hz
Impedance	4 Ohms

Loudspeakers

Speaker type	Coaxial speaker
Number of ways	2-way
Speaker size	10cm (4")
Number of Loud-speakers	2

Woofer

Diaphragm	Cone
Diaphragm material	Polypropylene
Surround	Cloth
Magnet	Ferrite
Magnet mass	4.4 Oz
Voice coil	Single
Voice coil material	Copper
Damper	Conex

Tweeter

Size	28mm (1-1/10")
Diaphragm	Dome
Diaphragm material	PEI
Magnet	Neodynium

Accessories

Speaker grille	With metal net
Quick start guide	English, Spanish, Portuguese, Russian
Cables	Speaker wires

Dimensions

Product depth	134 mm
Product height	63 mm
Product width	134 mm
Mounting depth	46 mm
Tweeter protrusion	4 mm
