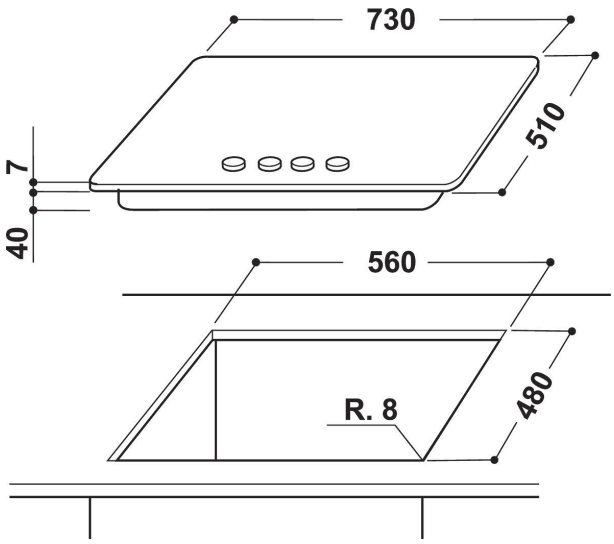
SENSING THE DIFFERENCE



Whirlpool gas hob: 5 gas burners - GOW 7553/NB

This Whirlpool gas Hob features: high efficiency burners, for reduced energy consumption.

FlexiFlame
Burners with two concentric rings for powerful, even, and controllable heat over a wide or small area. Burners always distribute the heat evenly and effectively for maximum flexibility and performance, while the ergonomic knob of the central burner offers complete control of the smaller ring only or both rings together.

High Efficiency Burners
High efficiency. Our High Efficiency Burners reduce energy consumption by 20%. Thanks to their innovative design and vertical flame, heat is delivered directly to the pots and pans, avoiding dispersion.

Full width cast iron grids
The full-width cast-iron pan support maximises the cooking surface with an edge-to-edge design so pans can slide effortlessly from one burner to another without any lifting and is durable enough to withstand damage and prevent rusting or scratching. Cooktop grids are made of cast iron, a top performing material resistant to high temperatures, durable in time that perfectly transmit heat. Restyled for added comfort and beauty, the distinctive design of the ergonomic knobs ensures easier use, greater control, and easeness of cleaning on steel and glass models.

Front Controls
Complete control over your cooking. Easily accessible and genuinely intuitive, the controls are conveniently positioned on the front panel of your hob, providing a frictionless cooking experience.
