Freshen up with beautiful natural light

You need a clean light to ensure your own cleanliness. The Philips myBathroom Teint LED ceiling light has a powerful light that shows true skin colour. With an optional dimmer, you can even vary the intensity to set the mood.

Designed for your bathroom

- True skin colour with high-quality light
- IP44, perfectly suited for your bathroom

Sustainable light solutions

- High quality LED light
- Energy saving
- Warm white light
- Adjustable light intensity with dimmer switch
- Long operating life of up to 20 years

PHILIPS

Highlights

True skin colour

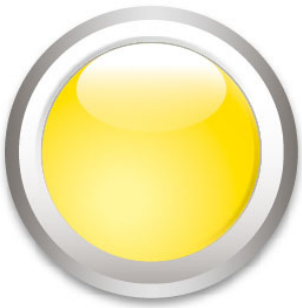

This Philips bathroom light makes colours reflect in a natural and accurate way, just the way the sun would do.

High quality LED light

The LED technology integrated into this Philips lamp is a unique solution developed by Philips. It turns on instantly, enables an optimal light output and brings out vivid colours in your home.

Warm white light

Light can have different colour temperatures, indicated in units called Kelvin (K). Lamps with a low Kelvin value produce a warm, more cosy light, while those with a higher Kelvin value produce a cool, more energising light. This Philips lamp offers warm white light for a cosy atmosphere.

Dimmable

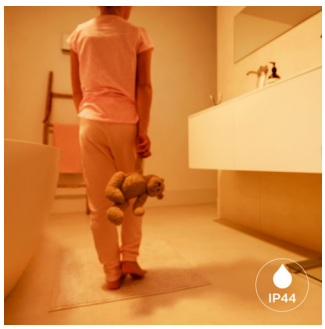

Adjust the light intensity of the Philips LED lights with a dimmer switch (not included). This makes this light ideal for creating an ambience for any occasion, whether a cosy meal à deux or chilling out with family and friends in your living room. Philips tested a number of wall dimmers that have proved to be compliant with our LED lights. A list of compatible dimmers is available in the downloads and support section.

Energy saving

This Philips energy-saving lamp conserves energy compared with traditional light sources, helping you to save money on your electricity bills and do your bit for the environment.

IP44 - bathroom-safe

This Philips bathroom light is especially designed for humid environments. It was tested rigorously to ensure its water resistance. The IP level is described by two figures: the first one refers to the protection level against dust, the second against water. This bathroom light is designed with IP44: it is protected against splashing water. This product is most commonly used and ideal for the bathroom.

Long operating life

A light source you can trust. The integrated LEDs used in this Philips LED lamp will last up to 20,000 hours (which equals 20 years on the basis of an average use of 3 hours/day with at least 13,000 on/off switching cycles). It feels so good to think that you won't have to worry about maintenance or light bulb replacement while having the perfect light ambience in your home.
