Highlights

Control from smart devices

Available on the App Store

ANDROID APP ON Google play

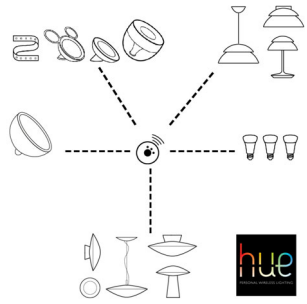

The Philips hue bridge lets you control your lights wirelessly from anywhere in your house. Be it from the living room, the dining table or from your bedroom, your smart device can control any light connected to the bridge.

Upgradeable

ZigBee Certified product

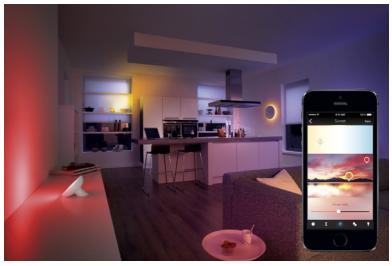

Philips Hue is based on ZigBee, a low power, safe, and reliable technology to control your lights. New features and improvements are continuously added to the system. Updates to both software and firmware are done wirelessly and seamlessly directly to your Hue product.

Expand your Hue ecosystem

You can connect up to 50 bulbs or lamps to the Philips Hue bridge. Simply begin with any of the available starter kits and start adding Philips Hue products. You can then control your lights at the swipe of a finger with the intuitive Philips Hue app for iOS and Android smart devices.

Create your own light settings

Use your favourite picture to generate the perfect colour scene for special occasions. Go back in time and relive those moments by uploading your own picture and tuning the lights accordingly. Add up to 50 lights to every setting, and recall with a simple tap of the finger.

Timer function

The timer function not only lets you pre-set what time your Hue product comes on, for light when you arrive home in the evening, but also lets you change your lights gradually over time. Use it to turn your Hue product into your wake-up light. Pre-set it to increase the brightness gradually to bring you out of your sleep softly and gently compared with the sudden beep or ring of a conventional alarm clock. At night, you can pre-set the timer to turn your lights off gradually to help you fall asleep naturally.

Light dynamics

The hue ecosystem is fully open for developers. There are an ever-growing number of applications being developed for hue within this community. This has resulted in creative and dynamic lighting schemes opening possibilities of syncing your lights to your favourite music, to get the party kicking.

Safety and security at home

Make it look like you are at home even when you are away. Set scheduled alarms or use timers to turn your lights on and off at fixed or random times. With online access, you can also control your home lighting directly via the app on your smart device. Enable geofencing in the app and your lights will automatically turn on or off when you enter or leave the house. Convenient and reassuring - wherever you are.
