- Get notifications without distraction

Inspiring experience with intuitive hue app

- Set lights to turn on and off when you're away from home
- Easy to operate with intuitive hue app

reddot award 2015 winner

universal design expert favorite 2015

PHILIPS

Features

Control from smart devices

The Philips hue bridge lets you control your lights wirelessly from anywhere in your house. Be it from the living room, the dining table or from your bedroom, your smart device can control any light connected to the bridge.

Safety and security at home

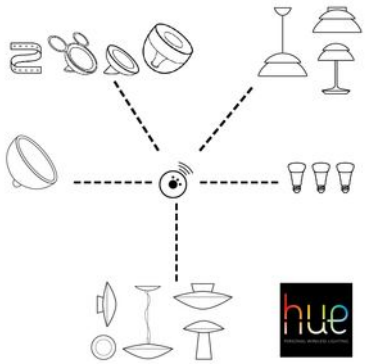

Make it look like you are at home even when you are away. Set scheduled alarms or use timers to turn your lights on and off at fixed or random times. With online access, you can also control your home lighting directly via the app on your smart device. Enable geofencing in the app and your lights will automatically turn on or off when you enter or leave the house. Convenient and reassuring - wherever you are.

Upgradeable

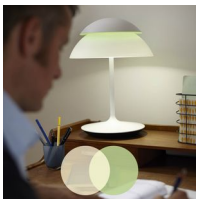

Philips Hue is based on ZigBee, a low power, safe, and reliable technology to control your lights. New features and improvements are continuously added to the system. Updates to both software and firmware are done wirelessly and seamlessly directly to your Hue product.

Expand your Hue ecosystem

You can connect up to 50 bulbs or lamps to the Philips Hue bridge. Simply begin with any of the available starter kits and start adding Philips Hue products. You can then control your lights at the swipe of a finger with the intuitive Philips Hue app for iOS and Android smart devices.

Double the hue experience

Read and work in harmony with how you feel, whether relaxed, energised or sociable – all through the power of light. Hue Beyond has two independent light sources – an uplight and a downlight – so you can create an endless mix of colours to match your mood and set functional lighting for your work or task, both at the same time.

Get the best functional light

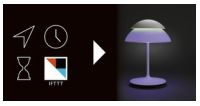

Get the best functional light for whatever you do. Read, write or get your work done with the high-quality LED light.

Make an endless mix of colours

Choose one colour, or combine different colours - thanks to the two independent light sources - to create the perfect atmosphere to match your mood, whether it's to relax, energise or explore.

Get gentle notifications

You can set this Philips hue light to gently notify you of messages, social media updates and other communications received through your smart device with a subtle pulse of coloured light. Gentle so as not to distract, but noticeable enough to get your attention, hue's ambient light notifications are a pleasant way to keep tabs on your incoming messages and updates as it suits you.

Intuitive hue app

Control your lights at the swipe of a finger with the intuitive hue app. Individually control each light, create and save your own scenes or use the light recipes for an optimal hue experience.
