Dry & style natural looks with care

Hair dryer for maximum care

Dry & style at once - the new Philips ProCare airstyler allows you to create beautiful natural styles, whilst providing maximum care for your hair. The innovative Paddlebrush helps you create a naturally straight hair style without damage.

Benefits

Beautifully styled hair

- 1000W for beautiful results
- 38mm thermo brush to smoothen your hair
- Retractable bristle brush for easy curling
- Narrow concentrator for focused airflow
- Volumizer for more volume at the roots
- Paddle straightening brush for naturally straight looks
- Three flexible heat and speed settings for more control

Less Hair Damage

- Less overheating with Even Heat Distribution technology
- More Care with ion conditioning for shiny, frizz-free hair
- Best drying temperature with ThermoProtect temperature
- Ceramic coated brushes for more care
- Cool air setting for gentle drying

Features

Advanced EHD technology

Advanced Philips EHD technology means that the attachments are designed to distribute the heat evenly. This ensures heat is always distributed very evenly - even at high temperatures - and prevents damaging hot spots. This provides maximum protection to the hair from overheating and thus helps to keep your hair healthy and shiny.

PHILIPS

Ionic Care

Ionic conditioning enables anti-static drying. Charged negative ions eliminate static hair, condition the hair and smooth down the hair cuticles to intensify the hair's shine and glossiness. The result is smooth and frizz-free hair that shines beautifully.

ThermoProtect temperature

The ThermoProtect temperature provides the optimal drying temperature and gives additional protection from overheating the hair. With the same powerful airflow, you will get the best results in a caring way.

1000W

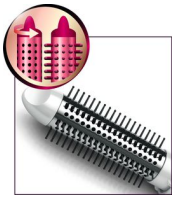

This 1000W hairdryer creates the optimum level of airflow and gentle drying power, for beautiful results every day.

38mm thermo brush

The thermo brush has an extra wide diameter of 38mm. The width of the barrel makes it the perfect styling tool for creating smooth styles and waves.

Retractable bristle brush

This easy to use airstyler is both a styling brush and curler in one. The bristles retract into the brush at the touch of a button, so you can easily slide the styler out of your hair. What's left is a beautiful bouncy curl.

Narrow concentrator

The concentrator works by focusing the flow of air through the opening onto specific areas. This results in precise styling and is great for touch ups or to finish a style.

Volumizer

The unique and innovative volumizer let's you create volume just where you want it - at the roots.

Paddle straightening brush

With the innovative paddle straightening brush you can create beautiful naturally straight looking hair, without causing any damage to the hair.

Three flexible settings

The speed and heat required can be easily adjusted to create the perfect end result. Three flexible settings ensure precise and tailored styling.

Ceramic coated brushes

The brushes have a ceramic coating, to prevent overdrying. It helps spread the heat more evenly and avoids hot spots on the hair, which lead to overheating and overdrying of the hair.

Cool air setting

A cold air setting is a low heat setting that gently dries the hair to minimize damage. This function is suitable for all hair types, but especially for fine, dry or damaged hair. It's a perfect setting for the hot summer season!

Specifications

[field not found 'disclaimer_text']

Technical specifications

Voltage	220 V
Wattage	1000 W

Attachments

Nozzle	For a focused airflow
Retractable bristle brush	For tangle free waves & curls
Paddle straightening brush	For naturally straight looks
