

Spotify multiroom speaker

- Spotify Connect
- Multiroom
- Just hit "PLAY"

SW700M/05

Spotify in every room

Enjoy authentic sound conveniently with 2 audiophile drivers and Spotify Connect. Play Spotify on any speaker using the Spotify app as a remote, expand your system wirelessly to any room and hit play to start where you left off.

Benefits

Using the Spotify app as a remote for your speakers

- Spotify Connect for an effortless native app experience
- Direct access buttons - no app required, for easier control
- Music keeps playing through calls, videos and games
- Music streams directly on speakers, save mobile battery

Multiroom speakers for you and your family

- Play music from one speaker at a time or all at once
- Philips companion app simplifies wireless speaker setup

Just hit the 'PLAY' button

- One-press 'Play' for the last heard Spotify track
- Press 'Play' for 'Music Follows Me'
- Flip from room (speaker A) to room (speaker B)

Natural clear sound

- Natural clear sound with 2 audiophile-grade drivers

PHILIPS

Features

Spotify as a remote

Using Spotify Connect you can easily browse, explore and play music from any room in the house using your smart device as a remote. With a direct Spotify connection, you can play music straight from the cloud so your smart device can be used for calls or videos, or even go out of range, without interrupting your music. This is also more battery-friendly, since the energy used for music is minimised. All the same great Spotify features are there, from its ready-made lists to its high sampling rates. Everything you need to discover new music and hear it at its best.

Multiroom speakers

Multiroom speakers let you play songs in one room, or in many at the same time, so your music can either follow you around the house or stay where you want it. Each person can play to any selected speaker, and when additional speakers are purchased they can be added to the system wirelessly and easily.

'Play' for the last heard song

Listen to your favourite tunes almost without interruption. Just hit 'Play' on the speaker to start playing the last song you heard on Spotify, without even unlocking your smart device.

'Play' for 'Music Follows Me'

When you press 'Play', music starts instantly on the speaker, regardless of whether it was last played on a smartphone, tablet or other smart device. This feature also lets you flip from one speaker to another in different rooms.

Direct access without app

Handy control buttons (Play / Pause, Volume Up / Down, Previous / Next) give you access to the controls you need, without fiddling with an app. Once an album, playlist or station has been selected, skipping tracks, repeating or pausing the music can be done at the touch of a button.

Twin audiophile-grade drivers

Two audiophile-grade drivers in the speaker create clear and natural sound reproduction, while two bass ports expand low-frequency bass, creating a truly immersive and dynamic sound. Enjoy powerful sound in a compact size.

Philips companion app

The Philips SpeakerSet Multiroom Manager app helps you set up and manage your Philips Spotify Multiroom speakers effortlessly. Simply connect your new Philips Spotify Multiroom Speaker to your home wireless network. If you have more than one speaker, use the app to group the speakers for Multiroom flexibility.
