

In-Ear Headphones

- 8.6-mm drivers/semi-closed back
- In-ear

SHE9100BK/00

Precision sound

with solid metal housing

The Philips SHE9100 headphones boast premium drivers and precision-crafted metal housing for detailed yet pure sound. Oval sound tubes and a choice of 3 ear tips ensure comfort and fit.

Benefits

Enjoy quality sound

- Sturdy aluminium housing prevents vibration for sound clarity
- Fine-tuned neodymium drivers for high-frequency clarity

Ultimate wearing comfort

- Curved housing and oval sound tubes for ergonomic comfort
- Silicone caps in choice of three sizes for customised fit

Always ready to go

- Anti-tangle slider keeps your cables together neatly
- Durable Flexi-grip for strong headphone-to-cable connection

PHILIPS

Features

Aluminium housing

The headphone's housing is crafted from sturdy aluminium, which prevents vibration for the purest sound performance. In addition, it protects the earphones from the wear and tear of everyday use.

Anti-tangle slider

The smart anti-tangle slider helps you easily keep the two earpiece cables neatly together, simply by gliding it up. No more hassles with tangles or knots!

Durable Flexi-grip connection

This soft yet durable and flexible connector between the earphone and cable helps protect against potential damage from repeated bending.

Finely tuned neodymium driver

Neodymium is the ideal material for producing a strong magnetic field for greater sensitivity in a voice coil, better bass response and higher overall sound quality. It features re-engineered 8.6-mm neodymium drivers that are responsive to high frequencies and ensure pure sound clarity.

Oval sound tubes

Your in-ear headphones are precisely designed to fit any ear. Their ergonomic oval sound tube and curved architecture ensure an optimised, secure and comfortable fit – always.

Silicone caps in three sizes

Your in-ear headphones come with a choice of 3 ear caps – from small to large – so you can select the perfect fit for your ears.

Specifications
