Cordless phone

- 1.6" display/ amber backlight
- Handset speakerphone

D2101B/63

Talk Handsfree

Our clever design gives you great sound reproduction without having to hold the phone to your ear - so you can talk completely handsfree. A true plug & play device with a user-friendly menu, a great chat has never been easier.

Benefits

Nice and simple

- Easy to read 4.1cm (1.6") graphical display with backlight
- Caller ID – so you always know who is calling*
- Freestanding handset with a speaker for easy handsfree calls
- Textured back cover for non-slip grip
- Programmable hot keys for quick dial
- Up to 16 hours talk time on a single charge

Crystal clear sound

- Advanced sound testing & tuning for superb voice quality
- Optimized antenna layout for great reception in any room
- Parametric Equalizer delivers pure and clear sound

Eco-conscious product

- Low radiation and power consumption

Features

4.1cm (1.6") graphical display

Advanced sound testing

We test the sound quality of our DECT phones the same way as high-end headphone manufacturers do. Using an advanced ear simulator, we can accurately re-create the way people actually hear. This helps our acoustic

engineers to measure and fine-tune things like frequency response, distortion and overall hearing perception, to create perfect voice reproduction for both handset and handsfree modes.

Caller ID*

Sometimes it is good to know who is calling before you answer. And our Caller ID lets you keep track of who is on the other end of the line.

Eco-conscious product

Philips phones are energy efficient and designed to be respectful to the environment.

Handset speakerphone

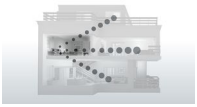

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Non-slip grip

The rear of the handset is treated with a special texture for added comfort and better grip.

Optimized antenna layout

Our optimized antenna layout ensures strong and stable reception – even in areas of the house where cordless transmission is difficult. Now you can take a call wherever you are in the house, and enjoy a long, uninterrupted conversation even as you walk around.

Parametric Equalizer

Our telephones use parametric equalization in the digital sound processing to fine-tune the sound response back to the intended linear frequency response curve, delivering sound that is pure and clear, for each conversation.

Programmable hot keys

Now calling the people you care about most is easier than ever. With simple one-touch dialing, you will never have to search for their number again. You can program up to 2 keys for instant calling.

Up to 16 hours talk time
