Olympus AS-2400 Transcription Kit

Part code: A-DM-AS2400
Foot control and software for transcribing audio files

Description

Plays DSS, DSS Pro, WMA, MP3 and WAV/AIFF audio formats in the background when another application is running, such as a word processor.
Enables foot switch control of the playback process.
Transcription can be done by combining the playback sound with the adjustable playback speed, tone control, and noise cancellation. However, it is not possible to playback while setting the playback speed and noise cancellation simultaneously with the Macintosh version.
Voice recognition of dictation files is possible with the Dragon Naturally Speaking 8.0 and later. *
Automatic software update through Internet.*
2 modes/views of operation for Transcribe bar.*

* Windows only

- AS2400 Includes RS-28 footswitch with USB adapter, E-102 headset and transcription software module
- Accepts DSSPro, DSS, WAV, WMA, and MP3 audio files
- Individual sorting/organisation of dictations and documents
- DSS file management using separate folders
- Job status info (e.g. finished, pending, cancel job)
- Use shared folder via LAN
- Playback speed control
