- Perfect milk foam thanks to Latte Perfetto technology
- Hot coffee from the first cup with Thermoblock
- Thorough cleaning thanks to fully removable brewing group
- Adjust and store your personal user profile
- Iconic stainless steel finishing, shaped to precision

Highlights

100% ceramic grinders

Our grinders are made of high-tech ceramic: exceptionally hard and precise. Fresh beans are gently ground, without risk of overheating: extracting all the best flavors and aroma, delivering a superior coffee taste for at least 20,000 cups.

4 beverages

Enjoy your favourite drinks for your special moments. Whether you crave for an espresso, a cofffee or a milk based recipe, your Super-automatic machine delivers a perfect in-cup result with no hassle and in no time!

Automatic Milk Frother

Preparing a velvety cappuccino is easy thanks to the Automatic Milk Frother. The milk frother, which baristas also call “cappuccinatore”, will draw the milk directly from a carton or jug, froth it automatically and dispensing it into your cup with a constant flow of milk without any splashing.

Auto-Rinse & Guided descaling

This espresso machine automatically cleans its coffee circuit with water upon starting up or switching off of the machine, this delivers a great, fresh taste with each cup of coffee.Regular descaling prolongs your espresso machine’s life. This machine will prompt when descaling is needed. It will guide you with on-screen messages what you have to do and when.

Customize your coffees

This Super-Automatic machine offers an abundance of indulgent options to customize your beverage to your taste. You can easily personalize and memorize length, strength and temperature for each drink. Feel free to explore, experiment and dream up any drink!

Front loading for easy access

Your super-automatic espresso machine is effortless to use thanks to the frontal loading of the water tank and the dump box.

Latte Perfetto Technology

Every coffee you prepare will be topped with a silky, milk layer that beckons the taste buds. The milk carafe froths the milk twice, then pours a splash free creamy layer into your cup at just the right temperature. The carafe can also be stored conveniently in the fridge and it is incredibly hygienic.

Thermoblock

Say goodbye to lukewarm coffee. Thermoblock ensures a hot coffee and cappuccino for you family from the first cup, in no time. The secret is in its light aluminum and stainless steel body, which can reach hot temperatures, fast.

Removable brew group

The brewing group is the heart of every super-automatic coffee machine, and should be cleaned regularly. The fully removable brewing group allows you to clean it thoroughly just by rinsing it under the tap

Specifications

General specifications

User Interface: Basic Display

Technical specifications
