PRODUCT DESCRIPTION

APPLIANCE

Refrigerator compartment
1. Fan
2. Fan cover and antibacterial filter area
3. Electronic control panel / light unit
4. Shelves
5. Bottle rack
6. Cheese box + Lid
7. Sensor cover
8. Cooler compartment (best for meat and fish)
9. Rating plate with commercial name
10. Fruits and vegetables crisper
11. Fridge drawer divider
12. Door reversibility kit
13. Door trays
14. Egg tray
15. Small items half balcony
16. Bottle separator
17. Bottle balcony
18. Door seal
Freezer compartment
18. Door seals
19. Stop frost accessory
20. Freezer drawers
21. Shelves
22. Freezer drawer divider
23. Bottom drawer: coolest zone best for freezing fresh food
24. Ice tray

CONTROL PANEL

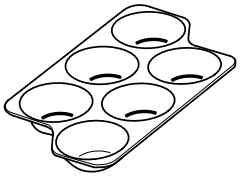

1. Indicator Leds (to display the current temperature setpoint or the Fast Cooling function)
2. Fast Cooling Button /Temperature Button

DAILY USE

See Use and Care Guide for more details on functions / see last page for information on how to obtain the Use and Care Guide

FUNCTIONS

TEMPERATURE SETTING

Press the Temperature button on the control panel to adjust the temperature from the warmest through the lower to the coldest level.
Pressing the Temperature button, the temperature setting will change cyclically.
At first plug-in of appliance temperature setpoint is present at medium position (factory setting).
Following table shows temperature setpoints:

HIGH TEMP.
MED-HIGH TEMP.
MEDIUM TEMP.
MED-LOW TEMP.
LOW TEMP.
FAST COOLING

Note: Displayed set points correspond to the average temperature throughout the whole refrigerator.

6TH SENSE

This function automatically works to ensure the optimal conditions to preserve the stored food.
The "6th Sense" function is automatically activated when:
• a large amount of food is loaded into the refrigerator
• the refrigerator door is left open for a long time
• a prolonged power failure takes place, causing the internal temperature of the
appliance to increase to values that cannot guarantee safe storage of food.

FAST COOLING

The use of the Fast Cooling function is recommended to increase the cooling capacity of the refrigerator compartment when placing a very high quantity of food within it.
To activate the Fast Cooling function, **press and hold for 3 seconds the Temperature button** on the control panel till all the 3 LEDs will turn on.
The function is automatically deactivated after 24 hours and return to previous selected set point.

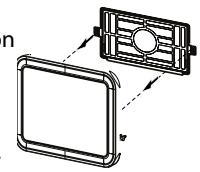

The function can be manually deactivated by pressing and holding for 3 seconds the Temperature button on the control panel.

REFRIGERATOR LIGHT

The light system inside the refrigerator compartment uses LEDs light, allowing a better lightning as well as a very low energy consumption.
If the LED light system does not work, please contact the Service to replace it.

Important: The refrigerator compartment light switches on when the refrigerator door is opened. If the door is kept open for more then 8 minutes the light will be automatically switched off.

FAN + ANTIBACTERIAL FILTER

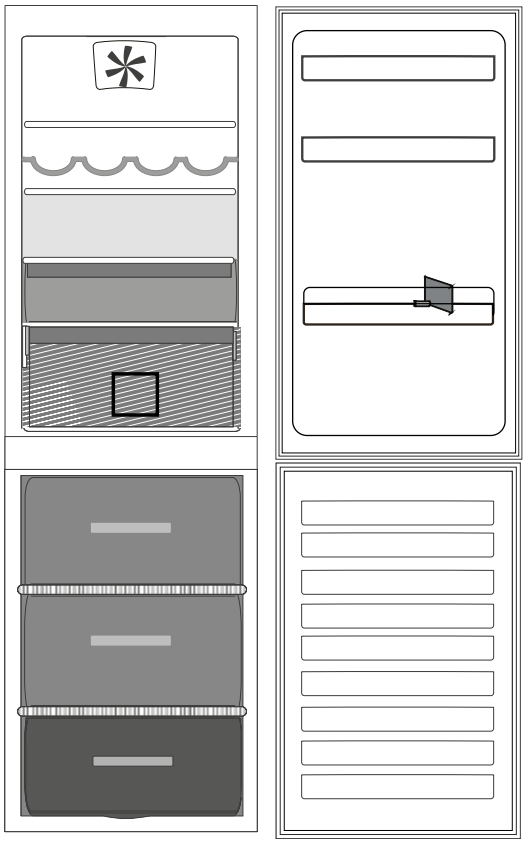

The Fan improves temperature distribution inside the refrigerator compartment, allowing better preservation of stored food. By default, the fan is switched on.
To turn off the fan press the button of fan.
Please note that when the fan is switched on it will not continuously work. The fan will start/stop working depending on the temperature and/or humidity level inside the fridge. It is therefore absolutely normal if the fan does not move even if the fan is switched on.
If the appliance has the Fan it can be equipped with the antibacterial filter. Remove it from the box placed in the crisper drawer and insert into the fan cover - as in the picture.
The replacement procedure is included in the filter box.

ALARM TABLE

ALARM TYPE	SIGNAL	CAUSE	CURE
Door open alarm	Refrigerator Light blinks	The door has remained open for more than 5 minutes.	Close the door
Door open alarm	Refrigerator Light OFF	The door has remained open for more than 8 minutes.	Close the door
Malfunction	Any temperature indicators blinks	Product malfunction.	Contact the After-sales Service

HOW TO STORE FOOD AND BEVERAGE

Legend

TEMPERATE ZONE Suggested for the storage of tropical fruit, cans, drinks, eggs, sauces, pickles, butter, jam

COOL ZONE Suggested for storage of cheese, milk, daily food, delicatessen, yogurt

COOLEST ZONE Suggested for the storage of cold cuts, desserts

FRUIT & VEGETABLE DRAWER

FREEZING ZONE DRAWER (MAX COOL ZONE) Suggested to freeze fresh/cooked food.

NORMAL FREEZER DRAWERS

Note: The Grey tone of the legend doesn't match with the color of drawers

FRIDGE COMPARTMENT

Use recyclable plastic, metal, aluminum and glass containers and cling film to wrap foods.

Always use closed containers for liquids and for food that may give off or be tainted by odor or flavor transfer or cover them.

If you have a little quantity of food to store in the refrigerator, we recommend to use the shelves above the crisper for fruits and vegetables since this is the coolest area of the compartment.

Foods which give off a large amount ethylene gas and those that are sensitive to this gas, such as fruit, vegetables and salad, should always be separated or wrapped so as not to reduce the storage life; for example do not store tomatoes together with kiwi fruits or cabbage.

To avoid bottles falling over, you can use the bottle holder (available on selected models).

Do not store food too close together to enable sufficient air circulation.

FREEZER COMPARTMENT

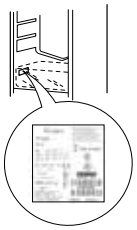

The freezer is the ideal storage location for store frozen food, make ice cubes and freeze fresh food in the freezer compartment.
The maximum number of kilograms of fresh food that can be frozen within a 24-hour period is indicated on the rating plate (… kg/24h).
If you have a little quantity of food to store in the freezer, we recommend to use the coldest areas of your freezer compartment, corresponding to the middle area.

MAINTENANCE AND CLEANING AND PROBLEM SOLVING
For maintenance and cleaning and for Problem Solving see the ***Use and Care Guide***.

The ***Use and Care Guide*** can be obtained by:
> After-Sales Service; phone number see in warranty booklet.
> download from Whirlpool Website http://docs.whirlpool.eu

CONTACTING AFTER-SALES SERVICE
Provide both numbers shown on the service sticker when contacting the After-Sales Service team. http://www.whirlpool.eu

The technical information are situated in the rating plate on the internal side of the appliance.
