Easy and intuitive experience

- Easy video downloads from the Internet to your GoGear
- Easy and intuitive user interface with album art display
- Folder view to organize and view media files like on your PC

PHILIPS

MP3 video player with FullSound™
Aria 8GB*

SA1ARA08KS/17

Highlights

FullSound™

Philips' innovative FullSound technology faithfully restores sonic details to compressed MP3 music, dramatically enriching and enhancing it, so you can experience CD music without any distortion. Based on an audio post-processing algorithm, FullSound combines Philips' renowned expertise in music reproduction with the power of the latest generation Digital Signal Processor (DSP). The result is fuller bass with more depth and impact, boosted voice and instrument clarity, and rich detail. Rediscover your compressed MP3 music in true-to-life sound that will touch your soul and move your feet.

Internet video download

View videos on the go with Internet Video Download, an easy-to-use feature that lets you download videos from video sharing sites (YouTube, MySpace or Google Video) to your GoGear. Install the PC application provided, connect your GoGear to your PC and use Internet Explorer to visit your favorite video sharing site. Choose a video and click the Download button that appears when you hover the mouse cursor over the video. No need to wait, just move on to other videos and start downloading more.

Voice recording

Voice recording converts your GoGear player into a handy dictation machine. Besides playing music or listening to radio, you can also record notes or reminders for work or school, record shopping lists and phone numbers – even song lyrics. By pressing the recording button and speaking into the built-in microphone, voice messages are compressed and stored in the built-in internal memory. Voice recording gives you a highly portable voice recorder allowing you to record anything, anytime and anywhere!
