Always on, always connected
- Up to 1 month of standby time
- Up to 20 hours of talk time
- Dual SIM for 2 groups of contacts

PHILIPS

Highlights

Big buttons and fonts

Your Philips mobile phone features large buttons with big printed fonts for dialing or texting by those with less dexterous fingers. And thanks to its big display fonts, you can now read the text on your screen comfortably without straining your eyes.

Digital text magnifier

Turn your phone into a convenient magnifying glass whenever you're caught out by tiny print. Hover the display screen of your phone above the selected text, whether it's a restaurant menu, a service brochure or even your daily newspaper and the digital text magnifier will blow it up to a large easy-to-read format.

Dual SIM

Organize your life better and keep your contacts separate by using 2 different phone numbers. With Dual SIM, you don't need to carry 2 phones around.

Emergency call button

Your Philips mobile phone is designed with a dedicated SOS button to give you and your loved ones peace of mind about your wellbeing in their absence. It allows you to identify a maximum of three different numbers where you can get immediate help when emergencies occur, whether within or outside your home. When you activate the SOS button, the phone will automatically connect to these numbers until your call gets answered by any one of the parties. This life-saving design means that you can retain your independence while maintaining easy access to immediate assistance in case you need help.

High volume speaker

With a high volume speaker, your phone can be set to emit a louder-than-normal ringtone if necessary. You will not have to worry about missing important calls, especially over ambient sounds at home or loud competing noises on the go. You can also opt to enjoy your favorite FM radio programs and music over a greater volume when it suits you.

Play FM radio out loud

The inbuilt antenna and speaker function on your Philips mobile phone means that you do not always have to plug in your earphones when you want to listen to the radio. Now you can enjoy your favorite radio stations out loud or in your ears, depending on your mood or circumstance.

Single button access to apps

Your mobile phone comes with a dedicated switch that you can customize to have your most frequently used functions or applications at your fingertips. Whether it's to listen to your favorite FM radio station, or to check your busy social calendar, or to take some pictures with the camera when you feel trigger-happy, you can do so with a single press of the button.
