The right light makes the moment

The more you dim, the warmer the light

Philips candles with a warm glow dimming offer a new experience in dimmable LEDs. As these Philips candles can be dimmed to the warm tones of traditional bulbs, you can go from everyday functional lighting, to inviting, to cosy atmospheres.

Benefits

Choose for the high-quality light
- Learn about light
- Special optical design creating sparkling light effect

Light beyond illumination
- Dims to a warm glow

Choose a simple replacement for your old bulbs
- No UV or InfraRed

Choose for a sustainable solution
- Long-life bulbs – Last up to 15 years
- Better for your wallet and your planet

Create the right light for your home
- Perfect for decorative fixtures

Comfortable LED light that is easy on your eyes
- Designed for the comfort of your eyes

PHILIPS

Features

Learn about light

Colour temperature: light can have different colour temperatures, indicated in units called Kelvin (K). Bulbs with a low Kelvin value produce a warm, more tranquil light, while those with a higher Kelvin value produce a cool, more energising light. CRI: the colour rendering index (CRI) is used to describe the effect of a light source on colour appearance. Natural sunlight has a CRI of 100. The CRI of Philips LED light bulbs is always higher than 80, which ensures that colours are shown as true and natural.

Sparkling effect

With its clear, elegant design and innovative LED technology, this decorative bulb produces a warm, sparkling light effect, adding a touch of tranquility to your home atmosphere.

WarmGlow dimming

With this dimmable bulb, you can dim from a 2200 K warm light to a 2700 K light. The more you dim, the warmer the light.

15,000-hour rated average life

With a lifetime of up to 15,000 hours, you can reduce the hassle of frequently replacing your light bulbs, and enjoy a perfect lighting solution for over 15 years.

Saves up to 80% energy

LED technology saves up to 80% energy compared to your standard bulb. It therefore pays for itself and saves you money year after year. It also helps to protect the environment.

Perfect for decorative fixtures

Modern lighting in Philips LED candles for use in decorative fixtures, such as in chandeliers, ceiling fans, vanity strips and post lights.

No UV or IR

The light has no infra-red component, so no heat is radiated. Also, there is no ultra-violet component in this light. These two characteristics mean that this light will not cause fabric and other items to fade.

Gentle LEDs, easy on the eyes

It's easy to see how harsh lighting can strain the eyes. Too bright, and you get glare. Too soft and you experience flicker. Now you can gently light up your world with LEDs designed to go easy on the eyes, and create the perfect ambience for your home.
