The right light makes the moment

the more you dim, the warmer the light

Philips LEDs with a warm glow dimming effect offer a new experience in dimmable LEDs. The gradual dimming feature enables light levels to dim to warm tones of traditional spots.

Choose for the high-quality light
- Learn about light

Light beyond illumination
- Dims to a warm glow

Choose a simple replacement for your old bulbs
- Similar shape and size as halogen reflectors
- No UV or InfraRed

Choose for a sustainable solution
- Long-life bulbs – Last up to 15 years
- Better for your wallet and your planet

Create the right light for your home
- Perfect for accent lighting

Highlights

WarmGlow dimming

With this dimmable bulb, you can dim from a 2200 K warm light to a 2700 K light. The more you dim, the warmer the light.

Replaces halogen spots

With its beautifully shaped design and familiar dimensions, this is a modern lighting, LED reflector. The perfect sustainable replacement for traditional halogen reflectors.

15,000-hour rated average life

With a lifetime of up to 15,000 hours, you can reduce the hassle of frequently replacing your light bulbs, and enjoy a perfect lighting solution for over 15 years.

Saves up to 80% energy

LED technology saves up to 80% energy compared to your standard bulb. It therefore pays for itself and saves you money year after year. It also helps to protect the environment.

Perfect for accent lighting

Modern lighting with a familiar wide-angle light output (36 degrees), this LED spot is suitable for both accent lighting and general-purpose lighting. It can be used in recesses and track light fixtures, and is ideal for use in kitchens, kitchen island lighting, living rooms and dining rooms.

No UV or IR

The light has no infra-red component, so no heat is radiated. Also, there is no ultra-violet component in this light. These two characteristics mean that this light will not cause fabric and other items to fade.

Learn about light

Colour temperature: light can have different colour temperatures, indicated in units called Kelvin (K). Bulbs with a low Kelvin value produce a warm, more tranquil light, while those with a higher Kelvin value produce a cool, more energising light. CRI: the colour rendering index (CRI) is used to describe the effect of a light source on colour appearance. Natural sunlight has a CRI of 100. The CRI of Philips LED light bulbs is always higher than 80, which ensures that colours are shown as true and natural.

Gentle LEDs, easy on the eyes

It's easy to see how harsh lighting can strain the eyes. Too bright, and you get glare. Too soft and you experience flicker. Now you can gently light up your world with LEDs designed to go easy on the eyes, and create the perfect ambience for your home.

Specifications

Bulb characteristics
- Shape: Spot
- Cap/fitting: GU10
- Dimmable
- Voltage: 220–240 V
- Wattage: 4
- Wattage equivalent: 35

Power consumption
- Energy efficiency label: A+
- Power consumption per 1000h: 4 kW·h

Light characteristics
- Light output: 250 lumen
- EyeComfort: Eye Comfort
- Beam angle: 36 degree
- Colour: From warm to extra warm white
- Colour temperature: 2200-2700 K
- Colour rendering index (CRI): 80
- Starting time: <0.5 s
- Warm-up time to 60% light: Instant full light

Durability
- Lifetime of lamp: 15000 hour(s)
- Number of switch cycles: 50000
- Lumen maintenance factor: 0.7
- Average life (at 2.7 hrs/day): 15 year(s)

Bulb dimensions
- Height: 54 mm
- Width: 50 mm

Other characteristics
- Mercury content: 0 mg
- Power factor: 0.7
- Lamp current: 19 mA
- Range: LED Classic

Rated values
- Rated power: 4 W
- Rated luminous flux: 280 lumen
- Rated lifetime: 15000 hour(s)
- Rated beam angle: 36 degree
