The right light makes the moment

the more you dim, the warmer the light

The gradual dimming feature enables light levels to dim to warm tones of traditional spots.

Benefits

Choose for the high-quality light
- Learn about light

Light beyond illumination
- Dims to a warm glow

Choose a simple replacement for your old bulbs
- Similar shape and size as halogen reflectors
- No UV or InfraRed

Choose for a sustainable solution
- Long-life bulbs – Last up to 15 years
- Better for your wallet and your planet

Create the right light for your home
- Perfect for accent lighting

Comfortable LED light that is easy on your eyes
- Designed for the comfort of your eyes

PHILIPS

Features

WarmGlow dimming

With this dimmable bulb, you can dim from a 2200 K warm light to a 2700 K light. The more you dim, the warmer the light.

Replaces halogen spots

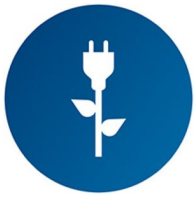

With its beautifully shaped design and familiar dimensions, this is a modern lighting, LED reflector. The perfect sustainable replacement for traditional halogen reflectors.

15,000-hour rated average life

With a lifetime of up to 15,000 hours, you can reduce the hassle of frequently replacing your light bulbs, and enjoy a perfect lighting solution for over 15 years.

Saves up to 80% energy

LED technology saves up to 80% energy compared to your standard bulb. It therefore pays for itself and saves you money year after year. It also helps to protect the environment.

Perfect for accent lighting

Modern lighting with a familiar wide-angle light output (36 degrees), this LED spot is suitable for both accent lighting and general-purpose lighting. It can be used in recesses and track light fixtures, and is ideal for use in kitchens, kitchen island lighting, living rooms and dining rooms.

No UV or IR

The light has no infra-red component, so no heat is radiated. Also, there is no ultra-violet component in this light. These two characteristics mean that this light will not cause fabric and other items to fade.

Learn about light

Colour temperature: light can have different colour temperatures, indicated in units called Kelvin (K). Bulbs with a low Kelvin value produce a warm, more tranquil light, while those with a higher Kelvin value produce a cool, more energising light. CRI: the colour rendering index (CRI) is used to describe the effect of a light source on colour appearance. Natural sunlight has a CRI of 100. The CRI of Philips LED light bulbs is always higher than 80, which ensures that colours are shown as true and natural.

Gentle LEDs, easy on the eyes

It's easy to see how harsh lighting can strain the eyes. Too bright, and you get glare. Too soft and you experience flicker. Now you can gently light up your world with LEDs designed to go easy on the eyes, and create the perfect ambience for your home.

Specifications

Bulb characteristics

Shape	Spot
Cap/fitting	GU10
Dimmable	Yes
Voltage	220–240 V
Wattage	5
Wattage equivalent	50

Power consumption

Energy efficiency label	A+
Power consumption per 1000h	5 kW·h

Light characteristics

Light output	350 lumen
EyeComfort	Eye Comfort
Beam angle	36 degree
Colour	From warm to extra warm white
Colour temperature	2200-2700 K
Colour rendering index (CRI)	80
Starting time	<0.5 s
Warm-up time to 60% light	Instant full light
Rated centre beam intensity	600 cd

Durability

Lifetime of lamp	15000 hour(s)
Number of switch cycles	50000
Lumen maintenance factor	0.7
Average life (at 2.7 hrs/day)	15 year(s)

Bulb dimensions

Height	54 mm
Width	50 mm

Other characteristics

Mercury content	0 mg
Power factor	0.7
Lamp current	25 mA
Range	LED Classic
Lamp Classification	RG0
Risk Group	

Rated values

Rated power	5 W
Rated luminous flux	395 lumen
Rated lifetime	15000 hour(s)
Rated beam angle	36 degree
