PHILIPS

Features

25° halogen light beam

With a familiar focused light output, equal in look and feel to Halogen reflectors, this LED reflector light bulb is suitable for both accent lighting and general-purpose lighting.

Cool white light (4000K)

Light can have different colour temperatures, indicated in units called Kelvin (K). Bulbs with a low Kelvin value produce a warm, cosier light, while those with a higher Kelvin value produce a cool, more energising light.

Homogen beam pattern

The Single Optic lens provides a superb light beam without shades compared with traditional halogen spots.
