Highlights

Consistently fabulous curls

The Philips ProCare Auto Curler rolls the hair onto the heated barrel and releases a perfect curl, everytime.

Ionic conditioning

Charged negative ions eliminate static, condition the hair and smooth down the hair cuticles to intensify the hair's shine and glossiness. The result is hair that is smooth, shiny and frizz-free.

Titanium ceramic barrel

Professional titanium barrel for fast curling, smooth gliding and shiny hair. The barrel's titanium ceramic coating combines excellent heat conduction with a super smooth surface to perfect curl creation.

Professional brushless motor

Durable professional brushless motor for creating curl in all different directions . Use for perfectly consistent right and left sided curls for a completely symmetrical look. Alternatively use the automatic curl function for a mix of both curl directions for a completely natural look.

3 heat & 3 timer settings

The 3 heat settings (180C-210C-230C) and 3 time settings (12sec - 10sec - 8sec) for natural, polished curls from loose to tight. Select the temperature for your hair type and use the speed settings to hold the curler to create the result you want.

30sec. heat-up time

High performance heater for a rapid heat-up time of just 30secs.

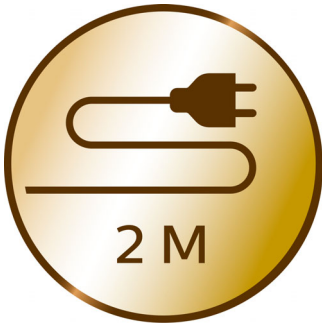

Easy to curl at the back

The Philips ProCare Auto Curler has an ergonomic, sensitive design that makes it easy to create perfectly consistent curls all over your head, even at the back.

No Burns

Unique heat isolating chamber for no burns during styling. Unlike traditional curlers, you'll never singe your fingers while using the Philips ProCare Auto Curler.

2.0m cord

The salon style long 2.0m cord ensures improved flexibility and ease of handling. This salon recommended cord makes it easy for you to use the Philips ProCare Auto Curler wherever you want and gives you plenty of space to achieve the look you want.
