Highlights

Bonus items not sold at retail

Now you can offer these exclusive Philips Sonicare Flexcare Platinum Connected bonus items your patients won't find anywhere else. Designed around patient needs for dental offices like yours, the package includes: 1 ProResults gum health brush head and 1 trial size (2 oz.) BreathRx rinse.

Smart Sensor Technology

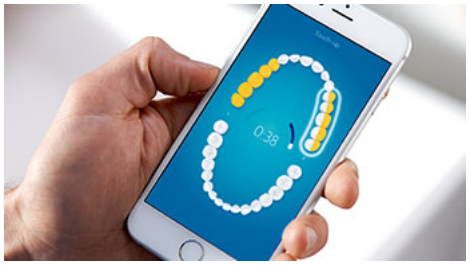

Three smart sensors send personalized brushing data to the Philips Sonicare app. Location sensor shows patients where they're brushing too little for better coverage. Scrubbing sensor helps guide patients to reduce scrubbing for optimized technique and a deeper, more gentle clean. Pressure sensor tracks brushing pressure and gently pulsates the handle to tell patients when to adopt a softer touch.

State-of-the-art 3D mouth-map

A personalized 3D mouth-map provides post-brushing analysis so patients can track and refine their routine and identify trouble spots that require extra attention.

Touch-Up

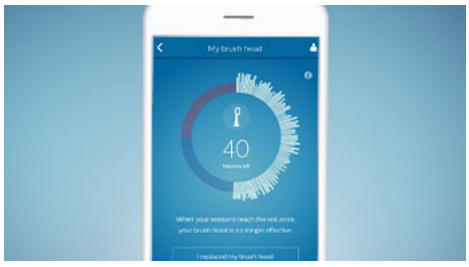

The Touch-Up feature displays customized guidance based on actual brushing data in order to immediately address missed areas.

Highlights trouble spots

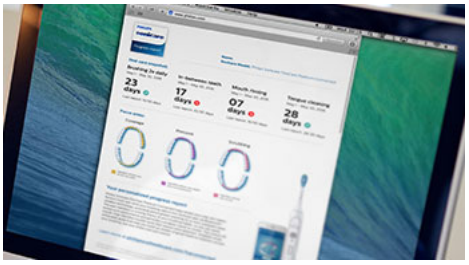

Based on advice from their dental professional, patients can highlight and address areas on the personalized mouth-map in need of extra care due to plaque buildup, gum recession or another issue.

Brush head monitor

Using actual brushing time and pressure, the brush head monitor alerts patients in three months or less when it's time to replace their brush head, ensuring continued effectiveness for the best results possible.

Goal-setting, progress reports

The Philips Sonicare app maintains a running history of a patient's personalized brushing data, allowing them to easily review performance and set daily and long-term goals. After 30 days, patients can generate an in-app progress report summarizing their brushing performance, with the added option of sharing reports with their dental professional via email.

BrushPacer and Smartimer

The BrushPacer tracks brushing through six segments of the mouth for a complete clean, while the Smartimer ensures that patients brush for the full two-minutes as recommended by dental professionals.
