Specifications

Bulb characteristics
- Shape: Spot
- Cap/fitting: GU5.3
- Dimmable: No
- Voltage: 12 V

Power consumption
- Wattage: 5 W
- Wattage equivalent: 50 W
- Light output [lumen value]: 390

Light characteristics
- EyeComfort: Eye Comfort
- Beam angle: 60 degree
- Color: White
- Color temperature: 3000 K
- Light effect/finish: White
- Color rendering index (CRI): 80
- Starting time: <0.5 s
- Warm-up time to 60% light: Instant full light
- Rated center beam intensity: 400 cd
- Application: Accent light

Durability
- Lifetime of lamp: 15000 hour(s)
- Number of switch cycles: 50000
- Lumen maintenance factor: 0.7
- Average life (at 2.7 hrs/day): 15 year(s)

Bulb dimensions
- Height: 44 mm
- Width: 50 mm

Other characteristics
- Mercury content: 0 mg
- Power factor: >0.5
- Lamp current: 580 mA
- Range: LED Classic

Rated values
- Rated power: 5 W
- Rated luminous flux: 390 lumen
- Rated lifetime: 15000 hour(s)
- Rated beam angle: 60 degree

Highlights

Cool, energizing light (3000K)
Light can have different color temperatures, indicated in units called Kelvin (K). Bulbs with a low Kelvin value produce a warm, more cozy light, while those with a higher Kelvin value produce a cool, more energizing light.

Homogen beam pattern
The Single Optic lens provides a superb light beam without shades compared with traditional halogen spots.

Saves up to 80% energy

Save up to 80% energy compared to your standard bulb. It pays for itself and saves you money year after year. So reduce your energy bill and start saving Now.

Gentle LEDs, easy on the eyes

It's easy to see how harsh lighting can strain the eyes. Too bright, and you get the glare. Too soft and you experience flicker. Now you can gently light up your world with LEDs designed to go easy on the eyes, and create the perfect ambience for your home.

No visible flicker
When your light flickers in quick succession it could be hard on the eyes, cause headaches, and even set off an attack for those with photosensitive epilepsy. It's both unpleasant and unnecessary. LEDs can flicker because of their rapid response to the driver current. However, because Philips LEDs are designed so that variations in your driver current's output are minimized, they eliminate the factors that cause flicker. So, you won't see it, not even a hint.
