LogiLink®
PROFESSIONAL

Active Fiber Optic HDMI Cable, High Speed, 4K x 2K

Technical Features

Input: 1x HDMI Type A Male

Output: 1x HDMI Type A Male

USB: 1x USB Type A Male

Converts electrical data signals to optical signals

Data rate up to 16 Gbps

HDMI (3D, 4kx2k)

CEC/DDC/HDCP compatible

Superior video quality – up to 3840 x 2160p

Easy to install with optical fiber cable

Color: Black

Technical Drawings

1) Plug the HDMI connector labeled TX in the source connector on the source device suchas DVD, Blu-ray, DVR, Set-top box, computer, tablet or video game console.
2) Plug the HDMI connector labeled RX in the receiving connector on the receiving device, such as TV, computer monitor or projector.
3) Connect the USB cable to a USB port on the receiving display device such as the TV.
4) Once you have completed this and both the source device and display device are powered on, a small blue LED will illuminate on both of the connectors which confirms that is working correctly.

Note: Fiber optic cable is constructed of precision glass fiber and can be damaged if pinched, twisted or tangled. Use caution to not bend, twist or tangle SHIP fiber optic cables more tightly than around your finger or in such a way as to pinch the cable.
