MC-500/22

Remote Control MP3 Music from Your PC

Enjoy the freedom of remote controlling your MP3 Music from your PC and savouring it through the MC-500's powerful, dynamic speakers. With USB PC Link for MP3 streaming and Max Sound, music lovers will appreciate this complete audio solution

Benefits

MP3 music at your fingertips

• USB PC link turns your PC into a massive MP3 music jukebox
• Song title and playlist name display for easy navigation

Power and performance

• MAX Sound for instant power boost
• 2-Way Bass Reflex Speaker System for powerful sound
• 2 x 50 W RMS and 2 x 100 W music power

Enrich your sound experience

• Digital Sound Control for optimised music style settings
• Virtual Environment Control allows simulated sound settings

PHILIPS

Features

USB PC Link

USB PC Link lets you playback your MP3 music through the powerful speakers of Philips sound systems instead of your PC speakers. By connecting a PC directly to your audio system with a USB cable, you can stream MP3 music directly to your sound system, transforming your PC into a 'massive MP3 music jukebox'. The control buttons on the sound system and remote control provide easy navigation and control of the MP3 music stored in the MusicMatch Playlist. You can also view song title information as well as elapsed play time on the sound system's display.

Song title display

MAX Sound

MAX Sound technology produces an instant boost in the bass, maximising volume performance and instantly creating the most impressive listening experience with just the touch of a button. Its sophisticated electronic circuitry calibrates existing sound and volume settings, instantly boosting the bass and volume to maximum levels, without distortion. The end result is a noticeable amplification of both sound spectrum and volume and a powerful audio boost that will add mileage to any music.

2-Way Bass Reflex System

2 x 50 W RMS/2 x 100 W music power

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classical controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Virtual Environment Control

Virtual Environment Control (VEC) creates a virtual sound environment in which the listener can experience music as it would sound in various simulated sound settings. VEC sound settings digitally mimic the acoustical effects that are characteristic of special rooms and environments such as hall, cinema, and concert. By recreating the sound ambience of different environments and settings, VEC dramatically enhances enjoyment of your favourite music.

Specifications
