

WindFall® PivotTack

K67963US

Product Description

PivotTack is the ultimate security accessory for your WindFall. Designed for more permanent installations for your home or business, this accessory requires a small hole to be drilled in your countertop or table. The result is a clean, secure and functional mounting system that guides your tablet's charging cable through the countertop or table. For enhanced security, add a ¼" shank padlock beneath the surface and the power cable won't be going anywhere without your knowledge.

Features

- TAA Compliant
