# Highlights

### 1600 Watt motor

1600 W motor generates strong suction power for excellent cleaning results.

### PowerCyclone 5 Technology

PowerCyclone 5 technology maximizes airflow and performance by separating dirt from air in one go. It delivers remarkable cleaning results through highly efficient steps: 1) Air enters fast into the PowerCyclone thanks to the air inlet design. 2) The curved airpass quickly accelerates the air in the cyclonic chamber to separate the dust from the air. 3) The optimized exit blades separate dirt from the cyclone and into the dust bucket.

### TriActive nozzle

The TriActive nozzle applies 3 cleaning actions in one go: 1) It gently opens the carpet with its specially designed soleplate to remove the dust deep down. 2) It sucks up big bits with its larger opening at the front. 3) It picks up the dust and dirt closely alongside furniture and walls with its left and right side air channels.

### Mini Turbo Brush nozzle

The Mini Turbo Brush quickly removes (animal) hairs, fluff, and dust from couches, cushions, and other fabrics. This brush is ideal for pet owners.

### ActiveLock couplings

The ActiveLock couplings allow you to easily connect and disconnect the different nozzles and accessories from the telescopic tube while cleaning.

### Integrated soft brush

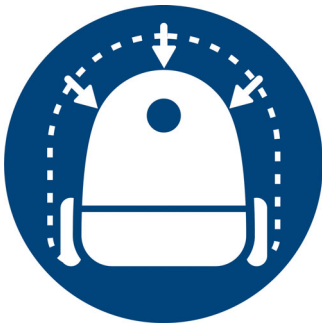

The vacuum cleaner is designed with a soft dusting brush, which is coveninently integrated in the handle of the appliance, always ready to use.

### Remote control

With the new remote control feature, you can switch the vacuum cleaner on/off or adjust the suction power settings without returning to the canister and interrupting your cleaning. The control buttons are conveniently located on the handle and the signals are sent to the canister via Infrared wireless technology. For a more comfortable and easier cleaning!

### Light weight and compact

You can easily carry and roll the vacuum cleaner around when cleaning thanks to its light weight and small size.
