800W

BHC199/01

Highlights

Ionic Care

Give your hair instant care with ionic conditioning. Charged negative ions eliminate static, condition your hair, and smooth the hair cuticles to intensify shine and glossiness. The result is smooth and frizz-free hair with beautiful shine.

Super low EMF

Specially innovated heater empowers significantly lower EMF(Electromagnetics fields) compared to normal 800W hair dryer. No more need to doubt or worry about if EMF would be harmful to kid's health, we make it more reassuring to use for you.

800W

800W drying power ensures extra-soft airflow for really comfortable drying experience for kids

ThermoProtect for kids

Children have thinner hair and scalp than adult which are more sensitive to heat damage. We specially adjusted drying temperature of ThermoProtect (Setting I) to be more gentle and adequate to kids.

Low noise design

Thanks to more gentle air flow, the noise level could be around 60dB at lowest in low speed setting, which won't scare children like normal dryer does.

Compact and foldable

KidCare dryer is light, compact and easy to be stored in small place or put into luggage thanks to its ergonomic design, integrating nozzle, and foldability.

Disney hairbrush

While you blow dry your little princess, she can brush her hair with the accessory, hair brush, to make this process full of fun. Lovely Elsa and Anna would accompany and witness the beautiful result.
