PHILIPS

Hairdryer
1500W

HP8233/01

Highlights

1500W caring dryer power
This 1500W hairdryer creates the optimum level of airflow and gentle drying power, for beautiful results, every day.

Premium Design
This hairdryer embodies a modern, sophisticated approach to design. Soft, fluid contours and elongated proportions subtly communicate femininity while precision detailing and high quality materials and finishes are evidence of the product's superior performance.

ThermoProtect temperature

The ThermoProtect temperature provides the optimal drying temperature and gives additional protection from overheating the hair. With the same powerful airflow, you will get the best results in a caring way.

Ionic conditioning

Give your hair instant care with ionic conditioning. Charged negative ions eliminate static, condition your hair, and smooth the hair cuticles to intensify hair's shine and glossiness. The result is smooth and frizz-free hair with beautiful shine.

Speed and temperature settings

The speed and heat required can be easily adjusted to create the perfect style. Six different settings ensure full control for precise and tailored styling.

Ultra slim styling 11mm nozzle

The ultra thin styling nozzle concentrates the flow of hair through the 11mm nozzle for precision styling on specific areas. Great for touch ups or to set your style.

Turbo boost

The turbo boost button increases the airflow, to dry your hair even quicker.

More care with Ceramic element
The ceramic element issues far infrared heat, which has a gentle warmth that helps dry your hair from within and protects it from overdrying, without compromising on speed and effectiveness.

Cool Shot

A must-have professional function for hair stylers. The Cool Shot button provides an intense burst of cold air. It is used after styling to finish and set the style.
