M3501B/22

Highlights

4.6cm (1.8") reverse display

High contrast, white-on-black reverse LCD display ensures easy reading and also blends well with the overall sleek design language.

50-name phone book

Save up to 50 favorite contacts in your phonebook.

Calibrated keypad

The calibrated keypad allows you to clearly feel every keystroke whenever you are dialing a number or entering a phonebook contact. Detailed study of keypad materials and structures, as well as extensive user tests result in the right balance between the key pressing force and the key response to ensure precise dialing.

Compact footprint

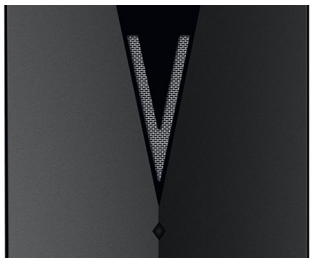

Slender design and compact footprint for space efficiency

ECO+ mode

Philips phones are energy efficient and designed to be respectful to the environment. When ECO mode is activated the emitted radiation is reduced by up to 60%, and up to 95% when the phone is charging. With ECO+ mode activation the radiation drops to zero.

Handset speakerphone

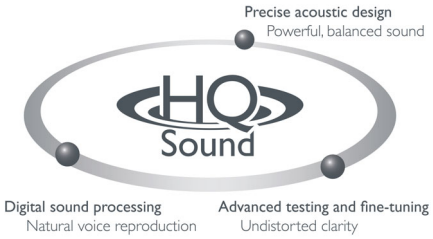

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Hassle-free charging

Charge handset either way around

HQ-Sound

HQ-Sound: high quality acoustic engineering for superb sound reproduction. We build upon decades of experience and breakthrough innovations in developing Hi-Fi audio products and high-end headphones to deliver excellent voice clarity on our DECT phones. When it comes to improving sound quality, our acoustics engineers and architects have thought of everything - high quality components, digital signal processing, precise acoustic design, advanced testing and fine-tuning. The result is sound that is crisp, clear and authentic. Sound so good and natural, it is almost like being there in person.

Micro-USB connector

The integrated micro-USB connector socket on the base unit ensures that the phone can stay powered via a pre-charged power bank, allowing you to make calls even if the power cuts out. The power bank charging feature supports most power bank products which are able to provide a minimum output current below 85mA without automatic shutdown. Power bank sold separately.

Privacy settings

Value your privacy and quiet at home? Black List restricts specific numbers or those starting with certain digits, protecting you from receiving unwanted calls. You can choose to block up to 4 sets of numbers. Each set can consist of 1 to 24 digits. If the number of an incoming call starts with any of these number sets or are the exact numbers that you chose to blocked, your phone will not ring. With Call Barring, you can avoid the surprise of expensive phone bills by blocking calls to specific numbers starting with certain digits (for example, pay per call numbers).

Up to 10 hours talk time

Enjoy 10 hours of talk time on a single charge
