Highlights

4.6cm (1.8") graphical display

High contrast, 4.6cm (1.8") white on black graphical display

Caller ID*

Sometimes it is good to know who is calling before you answer. And our Caller ID lets you keep track of who is on the other end of the line.

Eco-conscious product

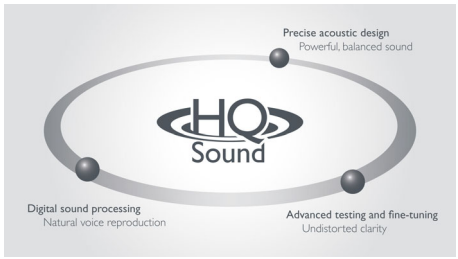

Philips phones are energy efficient and designed to be respectful to the environment.

Handset speakerphone

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

HQ-Sound

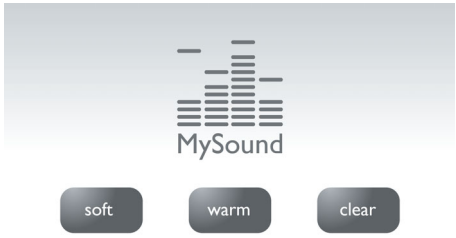

Philips cordless phones with HQ-Sound: build upon decades of experience and breakthrough innovations in developing Hi-Fi audio products and high-end headphones to deliver excellent voice clarity on our DECT phones. When it comes to improving sound quality, our acoustics engineers and architects have thought of everything – high quality components, digital signal processing, precise acoustic design, advanced testing and fine-tuning. The result is sound that is crisp, clear and authentic. Sound so good and natural, it is almost like being there in person.

Keypad backlight

The soft amber backlight makes keys easy to read in low light conditions and at night.

MySound profiles

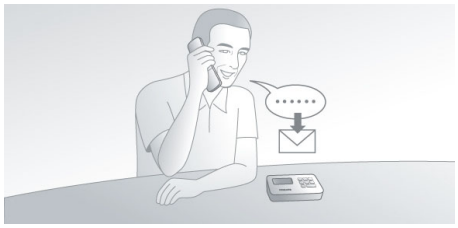

Sound perception is subjective, and everyone has their own listening preference. MySound brings personality back to every conversation by allowing you to choose the audio profile that best matches your sound preferences: Clear – to make voices sound crisper and clearer; Soft – for friendly, softer tones; Warm – to make voices sound welcoming and warm.

Up to 16 hours talk time

Up to 16 hours of talk time on a single charge

Family Notes recording

Need to get an important message to your loved ones? Physical notes won't get your true meaning or emotion across like your own voice can! Simply use the Family Notes function on the handset to record your audio message. Your loved ones will be notified and can retrieve the message just like on an answering machine. No more miscommunication!
