Do not clean the device with chemical substances

Disconnect the device from the power supply, when not in use

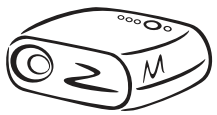

HIGHLIGHTS

- With this Salora Portable Home Theater projector, you can watch movies, sports, video's, pictures and much more as if you were watching a 120-inch screen with dynamic image quality.
- Plug your DVD or Blu-ray player in to one of the two available HDMI digital inputs or send a video file from your computer via the VGA port. In addition, you can use the AV port to connect another video player.
- You can plug in a USB memory device for the projection of your media files.
- The portable Home Theater projector delivers clear images under low light conditions. The audio can be played through the built-in speaker, but if you need more audio output, you can connect an external speaker or audio system using the 3.5 mm connector (included).It is one of the most lightweight and small size devices on the market and uses a LED light source that can last up to 30.000 hours.You can operate this projector by using the remote control (included) choosing the functions and menus.

Note:

Your Salora 60BHD3200 projector uses a LED light source, this is the most suitable light source, because of its long life. We recommend an environment which is not too bright for the playback of images.We do not recommend using the projector for Word or spreadsheet presentations because this projector is not meant to be used for professional educational purposes. It is recommended to be used mainly for playback of video and image files.
