Step by Step Set up Guide

Getting Ready

Before you start

Make sure your phone is compatible at jedichallenges.com/compatibility .

Get your gear ready

- Lenovo Mirage AR headset
- Phone tray (inserted in the headset)
- Tracking Beacon
- 2 x AA batteries
- Lightsaber Controller
- Your compatible smartphone
- The matching phone-to-headset

Setting Up the Phone

GET YOUR COMPATIBLE PHONE READY

1. Make sure the phone is connected to WiFi.
2. Go to jedichallenges.com/app with your phone browser and follow the instructions to download, or search for the Star Wars: Jedi Challenges app on the application store on your phone. Download and install the application

OPTIMIZING YOUR PHONE SETTINGS :

1. Disable adaptive brightness in settings / display
2. Set Brightness level to maximum in settings / display
3. Turn on location in settings / location
4. Set location to high accuracy in settings / location / mode
5. Turn on Bluetooth in settings / Bluetooth
6. Set media volume to above 70%

Setting Up the Experience

OPEN THE APP

And tap the screen to continue.

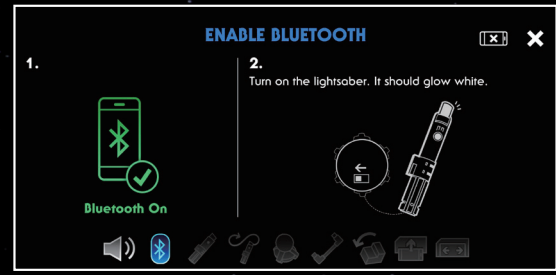

ADJUST THE VOLUME

If not set to maximum, set to maximum to insure best gaming experience. Swipe left to get to the next screen.

TURN ON THE LIGHTSABER

Turn on the Bluetooth on your phone, turn on the lightsaber using the power switch under its base.

CONNECT THE LIGHTSABER

Tap search for lightsaber. You have 10 seconds to click any lightsaber button. The lightsaber tip turns blue, which means it is connected. Swipe left to get to the next screen.

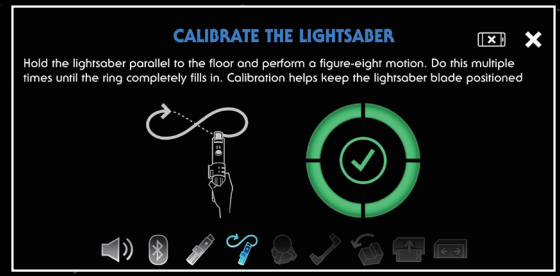

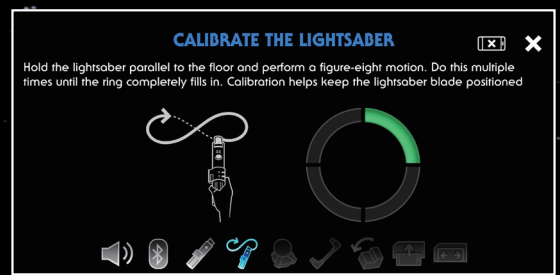

CALIBRATE YOUR SABER

- While standing in your play area, tab the calibration button
- Tab the calibration button
- Hold your lightsaber parallel to the floor
- And follow the instructions to make a figure-eight motion until the circle gets filled in and the saber vibrates in your hand.
- Swipe left to get to the next screen.

TIPS

On Android, if this fails it is because location is not enabled. Enable location in the settings of your Android phone.

PLACE YOUR TRACKING BEACON ON THE FLOOR

- Insert the included AA batteries inside the Tracking beacon.
- Turn on the beacon to pink.
- Place it on the floor in your play area.
- Make sure you will be able to stand 1.2 to 1.5m / 4 - 4.5 feet away from the beacon while playing.
- Swipe left to get to the next screen.

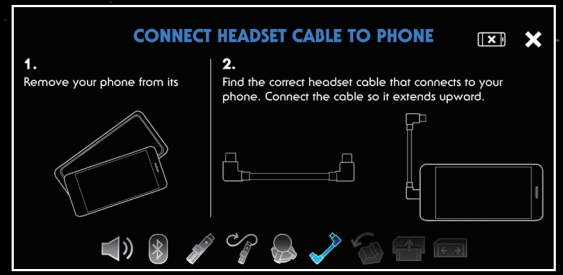

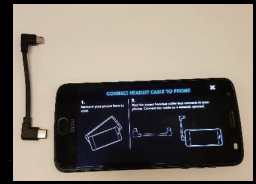

CONNECT YOUR CABLE

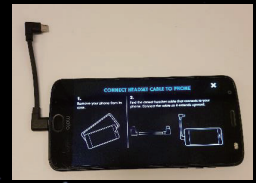

- Remove your phone protective case if you have one.
- Make sure to connect the cable as on the pictures, so the cable extends upwards.
- Swipe left to get to the next screen.

TIPS

Do not force to insert the cable in your phone. 3 cables are provided in the box, make sure to use the one matching your phone connector.

ACCEPT DISPLAY PERMISSIONS (ON ANDROID ONLY)

- Connect your phone to the headset to activate permissions and grant them.
- Accept the pop up that appears. Disconnect the cable from the headset when done, and Click the cross on top right corner to continue to the next step.

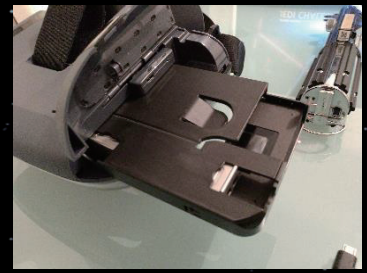

TAKE THE PHONE TRAY OUT FROM THE HEADSET

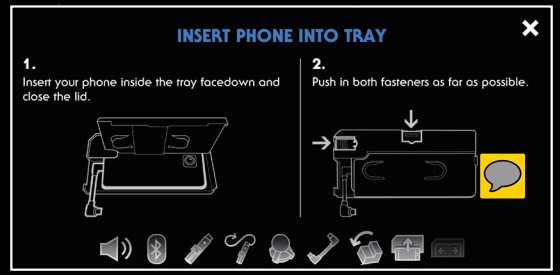

- Pull out the tray from the inside of the headset
- Pull it out completely so you are able to insert the phone

INSERT THE PHONE IN THE CASE

- Make sure the stopper is in the position indicated on the screen instructions. The position of the stopper depends on the phone model you are using.
- Tap “continue” before inserting the phone inside the tray
- When you see the dash-box on screen, place the phone inside the tray, face down, and close the tray.
- Fasten the phone by pushing the fasteners to max position.

CLICK LAUNCH ON THE SCREEN BEFORE INSERTING THE PHONE IN THE HEADSET

INSERT THE TRAY INSIDE THE HEADSET,

Slide in the tray, screen down all the way inside until it clicks in position

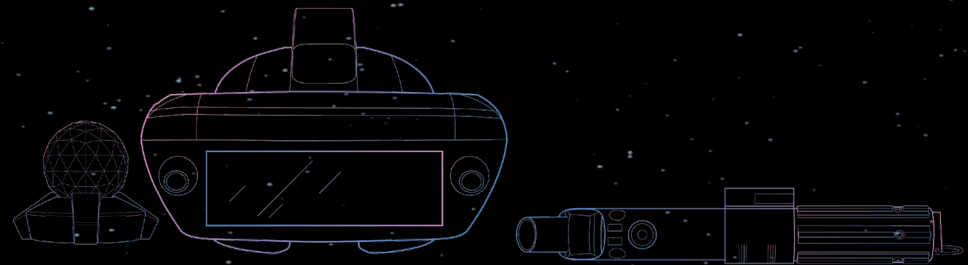

AND CONNECT THE PHONE TO THE HEADSET

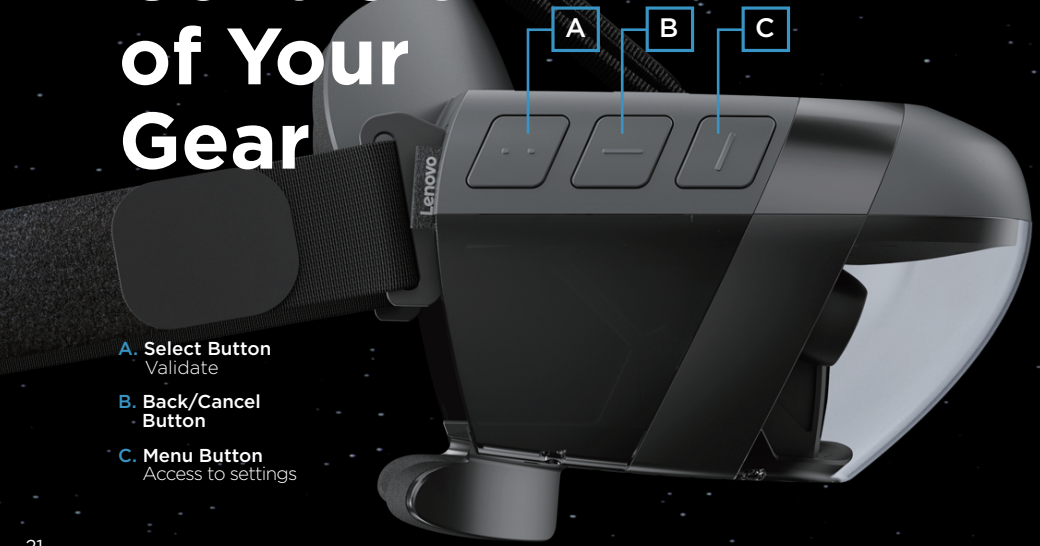

Connect the micro-USB to its port, the light will glow red

PUT ON THE HEADSET AND START YOUR JEDI TRAINING. MAY THE FORCE BE WITH YOU!
